Serial Murder and Media Circuses Dirk C. Gibson, 2006-07-30 The Axman of New Orleans specialized in killing grocers of Italian descent in the 1910s apparently to promote jazz music. Dorothea Puente was a little old landlady who murdered her tenants but kept cashing their government checks. The Manson Family terrorized California in the 1960s as did the Hillside Stranglers a decade later. Twelve serial murder cases occurring in eight decades between the 1890s and 1990s had one thing in common: significant presence of the mass media. This book examines these specific cases of serial murder and the way the media became involved in the investigations and trials of each. Gibson argues that the American media plays a multidimensional and integral role in serial killings and their investigation and that this role is not generally a positive one. Serial murder cases motivate the media in unfortunate ways and the result is that even typically respectable media organizations can be involved in such things as document theft or in interfering with the capture of serial murderers on the run. This link between multiple murderers and mass communication is not accidental or coincidental; rather, the relationship between the press and serial killers is one of extraordinary importance to both parties. Gibson examines the role of the media in serial murder cases, the body of knowledge on serial murder as seen through the lens of mass communication, the effectiveness of law enforcement responses to serial murderers and how they might be improved if the mass communication influence was better understood, the magnitude of the serial murder problem and the interaction between the media, the killers and serial murder investigations. Specific examples and numerous quotes are provided throughout to illustrate this strange and detrimental relationship between media and serial murderers.

Hunting Serial Predators Grover Maurice Godwin, 2018-01-18 The majority of the available published accounts of serial murderers are not in scholarly or technical publications. Even such few academic reviews as do exist typically commence with reference to fictional accounts so that the profile of a serial murderer is typically far from clear or precise. *Hunting Serial Predators* is unique in that each chapter, written in detail, explains how to research and interpret psychologically the crime scene actions of serial killers. The book provides the reader an empirical facet model of the crime scene actions of American serial murderers based on information available to a police inquiry, an overview of the related

scientific knowledge introducing a new method to classify the serial predator and accounts of the process and difficulties of profiling the serial murderer By presenting a classification model of serial murderers and their crime scene behaviors based on empirical and repeatable studies this book makes significant advances in the areas of police investigations etiology and treatment possible The empirical process used to analyze serial murderers crime scene actions described in Hunting Serial Predators makes it possible to make logical decisions about how to detect apprehend and eventually access their dangerousness

Profiling the Lethal Employee Michael D. Kelleher Ph.D.,1997-01-28 In this exploration of new possibilities for the reduction of workplace violence and occupational homicide within a variety of work environments Kelleher examines the crimes of the lethal employee or ex employee and develops a profile of characteristics and behaviors often associated with workplace violence or murder This profile in turn can be used to recognize potential violence before it occurs allowing employers to devise early and effective intervention strategies The author develops the profile of the potentially lethal employee through behavioral science models and an analysis of case histories of incidents of occupational homicide

Lethal Violence Homicide Research Working Group. Workshop,1997 Transgressing Women Jamaluddin Aziz,2012-01-17 Transgressing Women focuses on the literary and cinematic representation of female characters in contemporary noir thrillers The book argues that as the genre has grown expanded and been subverted since its initial conception along with the changing definition of gender the representation of a female character has also inevitably gone through some dramatic changes So the book asks some important questions What links the female characters in canonical noir to their contemporary counterparts Is gender division still relevant in a text that transgresses gender boundaries What happens when it is the human body itself that betrays the traditional definition or constitution of a human being While many have written about the male protagonists and the femmes fatales in the noir genre little attention has been given to the other female characters who inhabit the noir world and are transgressors themselves The main concern of the book is to trace the transgressive female characters in contemporary noir thrillers both novels and films by engaging itself with some of the most topical debates within both post feminist and postmodernist theories The book is structured around two key concepts space and the body These temporal and spatial indicators are central in contemporary

cultural theories such as postmodernism and post feminism along with other theorizations of gender and the noir genre This means that the analysis is drawn from the classical noir examples and will then arrive at the neo noir sub genre and then will move on to the most recent phenomenon in the genre future noir *The Laws of Genocide* Thomas W. Simon,2007-06-30 The tools of reason offer the best hope for the international community to confront the increasing incidents of hate throughout the world A historically informed normative examination of the elements of the crime of genocide provides an excellent case study of how the law reason s handmaiden enhances understanding and improves practical ways of dealing with global injustices How should we confront hate As political activists we could resort to fighting hate with hate As concerned citizens we could consciously ignore or actively protest hate As committed educators we could put the implements and survivors of hate on display As committed scholars we could resuscitate the idea of evil As humanitarian jurists we could put individual hate mongers on trial Part I of this book makes a case for making the maximum use of reason to deal with hate This means that we should actively debate those who promote hate Further as a close look at the history of applying law to incidents of hate and violence illustrates the courtroom proves to be an excellent place to demonstrate the virtues of applying the tools of reason not to global evils but to the grave injustices of the world In Part II Simon demonstrates the power of legal analysis in enhancing our understanding of genocide probably the worst injustice imaginable A close examination of each purported element of the crime of genocide redirects misguided turns taken by international jurists Contrary to a more realistic perspective adopted at the Nuremberg trials jurists have mistakenly modeled international criminal law on national criminal law which focuses on individual responsibility However the cases of grave injustices throughout the 20th century amply demonstrate the primary collective responsibility underlying incidences of genocide The failure to prosecute criminal organizations for genocide has and will continue to have disastrous results While the Nuremberg tribunal at least disbanded the responsible Nazi organizations current war crimes tribunals have allowed organizations responsible for the Rwandan genocide to continue to wreak havoc throughout Central Africa If the international community cannot forge a common understanding of genocide then it has little hope of establishing an international legal order or a global ethics

Proceedings of the Homicide Research Working Group Meetings, 1997 and 1998 Homicide Research Working Group. Annual Workshop,Homicide Research Working Group.
