Congress,1983 *Case Studies in Strategic Bombardment* R. Cargill Hall,Air Force History and Museums Program (U.S.),1998 **Life Under a Cloud** Allan M. Winkler,1999 Presents an account of the impact of the atomic bomb on American political and cultural life This title delineates how fears of nuclear disaster have become a part of our culture Tracing the debate over military and civilian uses of atomic power it reveals the irony anxiety and official insanity of the atomic age The Long War Andrew J. Bacevich,2009-06-22 Essays by a diverse and distinguished group of historians political scientists and sociologists examine the alarms emergencies controversies and confusions that have characterized America s Cold War the post Cold War interval of the 1990s and today s Global War on Terror The developments of this Long War have left their imprint on virtually every aspect of American life and by considering the period as a whole this volume is the first to take a truly comprehensive look at America s response to the national security crisis touched off by the events of World War II Contributors consider topics ranging from grand strategy and strategic bombing to ideology and economics and assess the changing American way of war as the twentieth century progressed They evaluate the evolution of the national security apparatus and the role of dissenters who viewed the activities of that apparatus with dismay and they take a fresh look at the Long War s civic implications and its impact on civil military relations More than a military history *The Long War* examines the ideas policies and institutions that have taken shape since the United States claimed the role of global superpower In breaking down the old and artificial boundaries that have traditionally divided the postwar period into neat historical units this volume offers fresh perspectives on the current state of American national security *Bulletin of the Atomic Scientists* ,1963-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Security Policy and Arms Control* Lawrence S. Eagleburger,1984 **Current Policy** ,1983 Better Safe Than Sorry Michael Krepon,2009-01-02 In 2008 the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight two minutes closer to Armageddon than in 1962 when John F Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba We still

live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb. And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved let alone since 9/11. Our worst fears still could be realized at any time but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today from containment and deterrence to diplomacy military strength and arms control. The bloated nuclear arsenals of the Cold War years have been greatly reduced nuclear weapon testing has almost ended and all but eight countries have pledged not to acquire the Bomb. Major powers have less use for the Bomb than at any time in the past. Thus despite wars crises and Murphy's Law the dark shadows cast by nuclear weapons can continue to recede. Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions. Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy deterrence containment and arms control. As he sees it The United States has stumbled before but America has also made it through hard times and rebounded. With wisdom persistence and luck another dark passage can be successfully navigated.

Subject Guide to Children's Books in Print, 1987 **The Future of Fallout, and Other Episodes in Radioactive World-Making** Joseph

Masco, 2020-12-18 In *The Future of Fallout and Other Episodes in Radioactive World Making* Joseph Masco examines the strange American intimacy with and commitment to existential danger. Tracking the simultaneous production of nuclear emergency and climate disruption since 1945 he focuses on the psychosocial accommodations as well as the technological revolutions that have produced these linked planetary scale disasters. Masco assesses the memory practices visual culture concepts of danger and toxic practices that in combination have generated a U.S. national security culture that promises ever more safety and comfort in everyday life but does so only by generating and deferring a vast range of violences into the collective future. Interrogating how this existential lag i.e. the material and conceptual fallout of the twentieth century in the form of nuclear weapons and petrochemical capitalism informs life in the twenty first century Masco identifies key moments when other futures were still possible and seeks to activate an alternative postnational security political imaginary in support of collective life today.

The End of Victory Edward Kaplan, 2022-11-15 *The End of Victory* recounts the costs of failure in nuclear war through the work of the most secret deliberative body of the National Security Council the Net Evaluation Subcommittee NESC. From 1953 onward US leaders wanted to know as precisely as possible what would happen if they failed in a nuclear war how many Americans would die and how much of the country would remain. The NESC told Presidents Dwight Eisenhower and John F. Kennedy what would be the result of the worst failure of American strategy a maximum effort surprise Soviet nuclear assault on the United States. Edward Kaplan details how NESC studies provided key information for presidential decisions on the objectives of a war with the USSR and on the size and shape of the US military. The

subcommittee delivered its annual reports in a decade marked by crises in Berlin Quemoy and Matsu Laos and Cuba among others During these critical moments and day to day containment of the USSR the NESC s reports offered the best estimates of the butcher s bill of conflict and of how to reduce the cost in American lives Taken with the intelligence community s assessment of the probability of a surprise attack the NESC s work framed the risks of US strategy in the chilliest years of the Cold War The End of Victory reveals how all policy decisions run risks and ones involving military force run grave ones though they can rarely be known with precision *The Emerging Shield* Kenneth Schaffel,1991 **Strategy for Chaos** Colin S. Gray,2002 The remit of this study is to encourage further studies that make an honest and successful effort to achieve synergy between social science and history when analysing the impact of revolutions in military affairs RMAs
