## **Owl Of Minerva Philosophers On Philosoph:**

*The Owl of Minerva* S. Jack Odell, 1975      **Philosophy and Neuroscience** Steven S. Gouveia, 2022-04-11 This book explores the methodological strategies for linking philosophy and neuroscience concerning the study of the conscious brain. The author focuses on four distinct methods for relating these two academic disciplines: isolationist, reductionist, neurophenomenological, and non-reductionist. After analyzing the pros and cons of these approaches, Steven S. Gouveia applies them to the concept of Qualia and Information to understand how the metaphilosophical assumptions of each approach influence the definitions of those specific concepts. Gouveia argues for an approach that conceives the interdisciplinarity of both philosophy and neuroscience in a particular and sound methodology, offering empirical examples of the explanatory power of this methodology over the others. Additionally, he shows how the metaphilosophical assumptions of each methodology usually taken by researchers implicitly and unconsciously influence their own approach to the methodological problem.

*The Unity of Content and Form in Philosophical Writing* Jon Stewart, 2013-07-18 In *The Unity of Content and Form in Philosophical Writing*, Jon Stewart argues that there is a close relation between content and form in philosophical writing. While this might seem obvious at first glance, it is overlooked in the current climate of Anglophone academic philosophy, which Stewart contends accepts only a single genre as proper for philosophical expression. Stewart demonstrates the uniformity of today's philosophical writing by contrasting it with that of the past, taking specific texts from the history of philosophy and literature as case studies. Stewart shows how the use of genres like dialogues, plays, and short stories were an entirely suitable and effective means of presenting and arguing for philosophical positions given the concrete historical and cultural contexts in which they appeared. Now, Stewart argues, the prevailing intolerance means that the same texts are dismissed as unphilosophical merely due to their form, although their content is in fact profoundly philosophical. The book's challenge to current conventions of philosophy is provocative and timely and will be of great interest to students and scholars of philosophy, literature, and history.

*Analytic and Continental Philosophy* Sonja Rinofner-Kreidl, Harald A. Wiltsche, 2016-08-08 The divide between analytic and continental philosophy has occupied a central place in the meta-philosophical discourse of the 20th and 21st century. This volume collects contributions from leading philosophers whose work is in some way impacted by the divide. While some of them tackle the issue in a straightforward manner, others focus on concrete problems in relation to which meta-philosophical differences actually do matter.

Critical International Theory Richard Devetak, 2018-07-11 Whether inspired by the Frankfurt School or Antonio Gramsci, the impact of critical theory on the study of international relations has grown considerably since its advent in the early 1980s. This book offers the first intellectual history of critical international theory. Richard Devetak approaches this history by locating its emergence in the rising prestige of theory and the theoretical persona. As theory's prestige rose in the discipline of international relations, it opened the way for normative and metatheoretical reconsiderations of the discipline and the world. The book traces the lines

of intellectual inheritance through the Frankfurt School to the Enlightenment German idealism and historical materialism to reveal the construction of a particular kind of intellectual persona the critical international theorist who has mastered reflexive dialectical forms of social philosophy In addition to the extensive treatment of critical theory's reception and development in international relations the book recovers a rival form of theory that originates outside the usual inheritance of critical international theory in Renaissance humanism and the civil Enlightenment This historical mode of theorising was intended to combat metaphysical encroachments on politics and international relations and to prioritise the mundane demands of civil government over the self reflective demands of dialectical social philosophies By proposing contextualist intellectual history as a form of critical theory Critical International Theory defends a mode of historical critique that refuses the normative temptations to project present conceptions onto an alien past and to abstract from the offices of civil government

**Alan Watts - In the Academy** Alan Watts, 2017-04-24 Gold Winner 2017 Foreword INDIES Book of the Year Awards in the Philosophy category To commemorate the 2015 centenary of the birth of Alan Watts 1915 1973 Peter J Columbus and Don Adrian L Rice have assembled a much needed collection of Watts's scholarly essays and lectures Compiled from professional journals monographs scholarly books conferences and symposia proceedings the volume sheds valuable light on the developmental arc of Watts's thinking about language and mysticism Buddhism and Zen Christianity comparative religion psychedelics and psychology and psychotherapy This definitive collection challenges Watts's reputation as a popularizer or philosophical entertainer revealing his concerns to be much more expansive and transdisciplinary than is suggested by the parochial Zen Buddhist label commonly affixed to his writings The editors' authoritative introduction elucidates contemporary perspectives on Watts's life and work and supports a bold rethinking of his contributions to psychology philosophy and religion

**Concepts of Philosophy in Asia and the Islamic World** Raji C. Steineck, Ralph Weber, Robert Gassmann, Elena Lange, 2018-05-07 The contributions to Concepts of Philosophy in Asia and the Islamic World reflect upon the problems implied in the received

notions of philosophy in the respective scholarly literatures They ask whether and for what reasons a text should be categorized as a philosophical text or excluded from the canon of philosophy and what this means for the concept of philosophy The focus on texts and textual corpora is central because it makes authors expose their claims and arguments in direct relation to specific sources and discourages generalized reflections on the characteristics of for example Japanese culture or the Indian mind The volume demonstrates that close and historically informed readings are the sine qua non in discussing what philosophy is in Asia and the Islamic world just as much as with regard to Western literature Contributors are Yoko Arisaka Wolfgang Behr Thomas Fr hlich Lisa Indraccolo Paulus Kaufmann Iso Kern Ralf M ller Gregor Paul Lisa Raphals Fabian Sch fer Ori Sela Rafael Suter Christian Uhl Viatcheslav Vetrov Yvonne Schulz Zinda and Nicholas Zufferey
