Wauer, 2010-06-28 From the bald eagle to the pileolated woodpecker the varied and abundant birdlife of the northwestern national parks is as impressive as the parks dramatic scenery To help both beginning and advanced birders make the most of their visits to these parks Roland Wauer has written this finding guide which introduces the most common birds and the most likely places to see them The book opens with practical advice on getting started in birding choosing binoculars bird identification proper field techniques etc Then after a concise discussion of the national parks as islands of bird habitat the succeeding chapters fully describe each park including its plant and animal communities and the facilities and interpretive activities available to visitors Wauer takes readers on walks through each park s most popular and accessible places where he explains the identification and behavior of the birds that visitors are most likely to see He closes each account with a review of the park s bird life and a list of key species Pen and ink drawings illustrate many of the birds *The Nature of the Place* Edward Kanze, 2025-04-15 A love letter to the Adirondacks revealing the hidden wonders and interconnected lives of its wildlife by one of the region s most prolific and prominent residents The Nature of the Place is storied Adirondack nature writer Edward Kanze s invitation to slow down smell the roses and get to know fellow creatures with more longstanding claims to this landscape than we have Theirs is the real internet a web of life that weaves together an almost infinite number of threads into a fabric that s a wonder to behold and something close to a miracle in a largely hostile universe In these dazzling pages readers meet the big charismatic animals of the Adirondacks the black bear and the moose We encounter little creatures too all of which lead fascinating lives while nearly unseen tiny fish that live in exquisite mountain streams the infuriating and almost invisible biting insects called no see ums centipedes millipedes and earthworms Discover an orchid that pays a steep price for its rough treatment of bumblebees plants so desperate for nitrogen they ve taken to catching animals and eating them poison ivy and the reasons why we might want to exchange our dislike of it for love and a common wildflower that goes through serial sex changes Loons owls falcons eagles and songbirds pour out effusions of apparent ecstasy here along with much about bobcats foxes snowshoe hares beavers and flying squirrels Snakes frogs salamanders and big predatory fish make appearances also as well as fungi that produce light in the dark and bacteria that manipulate the atmosphere to their own advantage even causing rain and snow to fall The Nature of the Place is Kanze s love letter to his home the Adirondacks Gathering materials from his decades long column at the

Adirondack Explorer and elsewhere extensively revised and rewritten for this book Kanze's singular meditations on the flora and fauna of his home resonate far beyond his own beautiful beloved biologically vibrant neck of the woods **Life**
