Ownership Solution Toward A Shared Capitalism For The 21st Century

Darcy Hitchcock, Marsha Willard

Ownership Solution Toward A Shared Capitalism For The 21st Century:

The Ownership Solution Jeff Gates, 1998-05-14 This ingenious and compelling look at the power inherent in widespread personal ownership Gerald Greenwald Chairman CEO United Airlines shows how to humanize and localize free enterprise by using ownership as a means for engaging more people in its design

Ownership Solution Jeff Gates, 1998-11-01 **The Ownership Solution** Jeff Gates, 1999 Why does capitalism seem to be a remote money driven system which increases inequality and directs resources into pointless or environmentally damaging projects if it is superior to central planning The answer is that it has forgotten to create more capitalists yet workers are more committed when they have a genuine stake in their company

Reengineering Capitalism Jan Emblemsvåg, 2015-08-11 This book provides an innovative approach to sustainable development one based on insights gleaned from the Industrial Revolution to the present and which highlights the importance of aligning economic interests with sustainable development considerations It investigates how a broad based systematic approach can be used to develop societies sustainably by integrating environmental issues into the capitalist system without value laden approaches which produce little more than politics and inaction as we are witnessing today The proposed approach focuses on realigning the financial markets to providing capital at reasonable cost to fuel innovation towards sustainable development across the entire economy This requires government policies that level the playing field and also intervene strategically in cases where the playing field is weak or missing Intended for researchers policy makers and graduate students the book will also benefit non governmental organizations economists and the general public

Unfolding Stakeholder Thinking Jörg Andriof, Sandra Waddock, Bryan Husted, Sandra Sutherland Rahman, 2017-09-08 This book the first of a two volume series argues that today stakeholder thinking has evolved into the study of interactive mutually engaged and responsive relationships that establish the very context of doing modern business and create the groundwork for transparency and accountability This book makes it clear that in today's societies successful companies are those that recognize that they have responsibilities to a range of stakeholders that go beyond mere compliance with the law or meeting the fiduciary responsibility inherent in maximizing returns to shareholders If in the past the focus was on enhancing shareholder value now it is on engaging stakeholders for long term value creation The process of engagement creates a dynamic context of interaction mutual respect dialogue and change not a one sided management of stakeholders Indeed the authors believe the very term stakeholder management to be outdated and corporate centric Companies can manage their relationships with stakeholders but frequently cannot actually manage the stakeholders themselves because as the activist and collaborative initiatives described in this volume suggest company stakeholder relationships are not one way streets and different institutions bring different agendas goals and priorities to the engagement There are clear implications to the way in which stakeholder thinking is unfolding today If in the past corporate social responsibility was simply seen as profitability plus compliance plus philanthropy now responsible corporate citizenship or corporate responsibility means companies being

more aware of and understanding the societies in which they operate Corporate responsibility means recognising that day to day operating practices affect stakeholders and that it is in those impacts where responsibility lies not merely in efforts to do good Companies are now faced with a wide array of challenges that mean that senior executives and managers need to be able to deal with issues including greater accountability human rights abuses sustainability strategies corporate governance codes workplace ethics stakeholder consultation and management Stakeholder thinking needs to capture these new realities The global reach of multinational corporations has served to highlight the need for the re integration of business into society relationships into stakeholder relations and ethics into managerial practice The rise in power of global activism involving NGOs and global business involving multinational corporations makes it even more critical today for companies to consider the power and interests of corporate stakeholders when developing strategic plans The interactivity and mutuality of relationships described in this book make it clear that firms and stakeholders share the power and responsibility to influence both the profit potential of the firm and how the benefits of the firm s success impact on society This important volume brings together leading academic thought on stakeholder thinking for the first time Unfolding Stakeholder Thinking will be indispensable to corporate managers NGOs and academics seeking greater understanding of the dynamics of stakeholder thinking in a world of rapidly changing responsibilities A companion volume Unfolding Stakeholder Thinking 2 focusing on practical issues such as relationship management communication reporting and performance is also available
