Open Access and the Future of Scholarly Communication Kevin L. Smith, Katherine A. Dickson, 2016-10-05 It is impossible to imagine the future of academic libraries without an extensive consideration of open access the removal of price and permission barriers from scholarly research online As textbook and journal subscription prices continue to rise improvements in technology make online dissemination of scholarship less expensive and faculty recognize the practical and philosophical appeal of making their work available to wider audiences As a consequence libraries have begun to consider a wide variety of open access flavors and business models These new possibilities have significant impact on both library services and collection policies and the call for new skills within library staffing Volume 9 of the series *Creating the 21st Century Academic Library* is the first of two addressing the topic of open access in academic libraries and focuses on policy and infrastructure for libraries that wish to provide leadership on their campus in the transition to more open forms of scholarship Chapters in the book discuss how to make the case for open access on campus as well as the political and policy implications of libraries that themselves want to become publishing entities Infrastructure issues are also addressed including metadata standards and research management services Also considered here is how interlibrary loan preservation and the library s role in providing textbooks support the concept of open access It is hoped that this volume and the series in general will be a valuable and

exciting addition to the discussions and planning surrounding the future directions services and careers in the 21st century academic library *Resources in Education* ,1999-10 Cumulated Index Medicus ,1967 *Architecture and Sacrament* David Wang,2020-03-25 David Wang's *Architecture and Sacrament* considers architectural theory from a Christian theological perspective specifically the analogy of being *analogia entis* The book tracks social and cultural reasons why the theological literature tends to be separate from contemporary architecture theory Wang argues that retrieval of the sacramental outlook embedded within the analogy of being which informed centuries of art and architecture in the West can shed light on current architectural issues such as big box stores the environmental crisis and the loss of sense of community The book critiques the materialist basis of current architectural discourse subsumed largely under the banner of critical theory This volume on how European ideas inform architectural theory complements Wang's previous book *A Philosophy of Chinese Architecture Past Present Future* and will appeal to architecture students and academics as well as those grappling with the philosophical moorings of all built environments Exploring Gypsiness Ada I. Engebriksen,2007-10-01 Romania has a larger Gypsy population than most other countries but little is known about the relationship between this group and the non Gypsy Romanians around them This book focuses on a group of Rom Gypsies living in a village in Transylvania and explores their social life and cosmology Because Rom Gypsies are dependent on and define themselves in relation to the surrounding non Gypsy populations it is important to understand their day to day interactions with these neighbors primarily peasants to whom they relate through extended barter The author comes to the conclusion that although economically and politically marginal Rom Gypsies are central to Romanian collective identity in that they offer desirable and repulsive counter images incorporating the uncivilized immoral and destructive other This interdependence creates tensions but it also allows for some degree of cultural and political autonomy for the Roma within Romanian society **Bridging the Border** Rodolfo O. de la Garza,Jesús Velasco,1997 Mexico's foreign policy toward the United States is in a period of transition sparked by the passage of NAFTA and sustained by ongoing political economic and environmental concerns Here distinguished scholars from Mexico the U S and the U K take up questions relating to the future of Mexico U S relations in crucial areas including lobbying and diplomacy labor relations immigration and expatriation and international finance **Political and Civic Leadership** Richard A. Couto,2010-09-14 This work within The SAGE Reference Series on Leadership provides undergraduate students with an authoritative reference resource on political and civic leadership This 2 volume set focuses on the 100 most important topics issues question and debates specific to politics and civic society Entries provide students with more detailed information and depth of discussion than typically found in an encyclopedia entry while avoiding much of the jargon detail and density one might find in a journal article or a research handbook chapter Key Features Includes entries written by a global panel of renowned experts Offers broad coverage of important of the moment topics related to political and civic leadership including explorations of the personalities and environments of political leaders leadership roles in

governance and allegiance citizen activists and civic engagement political campaigning urban politics and leadership public management ethics in politics policy development and implementation executive management of public opinion political speechmaking and the bully pulpit congressional leadership crisis management and more Considers the history of political and civic leadership with examples from the lives of pivotal figures as well as the institutional settings and processes that lead to both opportunities and constraints unique to the political realm Provides students with more depth than usual encyclopedic entries while avoiding the jargon detail and density of more advanced works Features an approachable and clear writing style with appeal to undergraduate researchers and offers a list of further readings after each entry as well as a detailed index and an online version of the work to maximize accessibility for today's students **Nigerian Speculative**

Fiction Chukwunonso Ezeiyoke, 2025-05-30 This book is an exciting addition to a gap in non-Western genre studies of African fiction It challenges the dominant canonicity of African literature which is overshadowed by texts concerned with the colonial discourse and writing back while exploring speculative themes in Nigerian fiction and writing that stem from an African cosmology and culture The book examines important twentieth-century precursors of the post-millennial boom in Nigerian Speculative Fiction SF reading texts that were omitted from the Nigerian literary canon developed in the 1960s It combines an analysis of recent fiction and criticism with a historical overview of the development of the under-researched area of Nigerian SF Through these readings the author demonstrates the range of concerns explored by Nigerian SF including futurism posthumanism horror fantasy and science fiction among others This book argues that these narratives exceed the binary implicitly sustained by the texts that write back to the West and offers new readings of contemporary Nigerian SF works that imagine futures different from the past and present conditions imposed by capitalism colonialism and imperialism Providing new theoretical tools and concepts this book in the Studies in Global Genre Fiction series will be of interest to readers and scholars working in the fields of African studies African culture and society literature and language interdisciplinary literary studies area studies literary criticism and genre studies [Handbook of Cultural Psychology](#)
