further studies which use computers to gather data on large numbers of individual consultations The findings indicate that there is little difference between three major EFL dictionaries in terms of speed of consultation and overall productive success They also indicate that Malaysian ESL subjects who have higher vocabulary scores are slower in their reading and less successfull in their interpretation of entries than Portuguese EFL subjects Finally the findings suggest that overall productive success is unaffected by the presence or absence of examples The experimental findings lead to the conclusion that dictionary consultation is a process in which users match pre existing beliefs about word meaning and behaviour against segments in the dictionary entry Such segments are often selected because they are familiar sounding and conceptually accessible but may contain only incomplete or non essential information Where pre existing beliefs and dictionary information conflict dictionary information is sometimes overridden Thus word knowledge acquired from a single consultation is often insufficient to ensure productive success Although it is probably inevitable that word knowledge will be acquired slowly through multiple encounters modifications to the dictionary entry and the training of users might help to avoid serious misinterpretation of dictionary information   Words, Grammar, Text Rosamund Moon,2009-07-10 John Sinclair s work is widely known and has had a far reaching influence particularly in the areas of corpus linguistics lexis phraseology lexicography grammar and discourse analysis This collection of papers written by former colleagues at Birmingham University looks at some key writings by John Sinclair with the intention of showing why his ideas are of lasting significance Contributions deal with the Cobuild Project directed by Sinclair and its innovative first dictionary collocation and the Open Choice and Idiom Principles the interactions between and interdependence of phraseology and grammar semantic prosody and the construction of meaning in text This volume was originally published as a Special Issue of International Journal of Corpus Linguistics 12 2 2007   Memory Mind & Body Biswaroop Roy Chowdhury,2023-07-19 This book is based on the principles of mnemonics and laws of controlled association and if you apply the principle you will be able to bestride both the world of memory and world of knowledge simultaneously giving yourself greater self confidence a growing mastery of imagination improved creativity and vastly improved perceptual skills In fact education system has created pressure on students in which memory the technique by Biswaroop Roy Chowdhury can provide some rescue
