liberalism *Focus: Choral Music in Global Perspective* André de Quadros, 2019-03-11 *Focus Choral Music in Global Perspective* introduces the little known traditions and repertoires of the world's choral diversity from prison choirs in Thailand and gay and lesbian choruses of the Western world to community choruses in the Middle East and youth choirs in the United States. The book weaves together the stories of diverse individuals and organizations examining their music and pedagogical practices while presenting the author's research on how choral cultures around the world interact with societies and transform the lives of their members. Through an engaging series of portraits that pushes beyond the scope of extant texts and studies, the author explores the dynamic realm of world choral activity and repertoire. These personal portraits of musical communities are enriched by sample repertoire lists, performance details, and research findings that reposition a once Western phenomenon as a global concept. *Focus Choral Music in Global Perspective* is an accessible, engaging, and provocative study of one of the world's most ubiquitous and socially significant forms of music making.

Aristotle's De Anima in Focus Michael Durrant, 2015-08-14 Originally published in 1993, this book presents an amended version of R. D. Hick's classic translation of Aristotle's *De Anima* Books 2 and 3, with pertinent extracts from Book 1, together with an introduction and six papers by prominent international Aristotelian scholars. The editor brings together up-to-date discussions of Aristotle's *De Anima*, examining central topics such as the nature of perception, perception and thought, thinking and the intellect, the nature of the soul, and the relation between body and soul. These papers draw attention to the importance and value of Aristotle's original contributions both to these topics and to philosophical psychology in general. They show the relevance of Aristotle's ancient classical philosophy to contemporary philosophical debate. This book also examines the key issues of Aristotle's thesis and aims to demonstrate its enduring significance. The *De Anima* is placed within a wider Aristotelian framework and also within a more comprehensive structure as a contribution to philosophical development and advance.

Focus: Music and Religion of Morocco Christopher Witulski, 2019-05-13 *Focus Music and Religion of Morocco* introduces the region and its history, highlighting how the pressures of religious life, post-colonial economic struggle, and global media come together within Moroccan musical life. Musical practices contextualize and clarify global historical and contemporary movements, many of which remain poorly understood, while articulating the daily realities of the region's populations in ways that rarely show through current news accounts of religious extremism, poverty, and inequality, and forced migration. As with other volumes in the series, *Focus Music and Religion of Morocco* addresses large conceptual issues through interwoven case studies in three parts. Part I, *Memories and Medias Who We Are*, highlights how

issues of religion colonialism nationalism and globalization transcend boundaries through music to create a sense of personal and national identity whether hundreds of years ago or on today's satellite television stations Part II Contesting Mainstreams Where We're Going explores Morocco's sacred and secular music practices as they relate to the country's diversity and its contemporary politics Part III Focusing In Faith and Fun in Fez highlights Fez's sacred music industry by introducing musicians who navigate musical and religious expectations to appeal to both their own devotional ethics and their audiences wants Links to music examples referenced in the text can be accessed on the eResource site www.routledge.com

Modal and Focus Particles in Sign Languages Annika Herrmann, 2013-12-12 Bringing together the research fields of sign language linguistics and information structure this book focuses on the realization of modal particles and focus particles in three European sign languages German Sign Language Sign Language of the Netherlands and Irish Sign Language As a cross-linguistic investigation based on a systematic methodological approach the study analyzes the results particularly with regard to nonmanual features expressed by articulators such as the body head and face The analyses of the data provide interesting insights into the syntax-prosody interface in sign languages and the interaction of syntax and prosody in general Modal and focus particles have not been thoroughly investigated in sign languages This volume represents the first study on this

phenomenon and is thus an innovative contribution to the field. From a methodological and theoretical perspective it draws on up to date linguistic tools and provides professionally elicited and annotated data. The book accounts for the results within existing theoretical models. Given its specific focus on nonmanuals the book contributes to recent debates on information structure and the syntax prosody interface and will be of special interest to both sign and spoken language linguists.

Focus On: 100 Most Popular American Agnostics Wikipedia contributors, **Focus Manifestation in Mandarin Chinese and Cantonese** Peppina Po-lun Lee, 2019-05-23 One prominent function of natural language is to convey information. One peculiarity is that it does not do so randomly but in a structured way with information structuring formally recognized to be a component of grammar. Among all information structuring notions focus is one primitive needed to account for all phenomena. **Focus Manifestation in Mandarin Chinese and Cantonese: A Comparative Perspective** aims to examine from a semantic perspective how syntactic structures and focus adverbs in Mandarin Chinese and semantic particles in Cantonese conspire to encode focus structures and determine focus manifestation in Chinese. With both as tonal languages Mandarin Chinese and Cantonese manifest different morpho syntactic configurations to mark focus. A general principle governing focus marking in Mandarin Chinese and Cantonese is given in the book which aims to give a better understanding on the underlying principles the two used to mark additive and restrictive meanings and related focus interpretations. Particular attention is also drawn to the co occurrence of multiple forms of restrictive and additive particles in Cantonese including adverbs verbal suffixes and sentence final particles. Linearity has shown to be an important parameter to determine how focus is structured in Cantonese. This book is aimed at advanced graduate students researchers and scholars working on Chinese linguistics syntax and semantics and comparative dialectal grammar. Focus Realization in Romance and Beyond Marco García García, Melanie Uth, 2018-11-15 What are the linguistic means for expressing different types of foci such as narrow information focus and contrastive focus in Romance languages and why are there such differing views on such a presumably clear cut research subject? Bringing together original expert work from a variety of linguistic disciplines and perspectives such as language acquisition and language contact this volume provides a state of the art discussion on central issues of focus realization. These include the interaction between prosody syntax and pragmatics the typology of word order and intonation languages the differentiation between focus and related notions such as contrast and presupposed modality and the role of synchronic variation and change. The studies presented in this volume cover a broad range of Romance languages including French Italian Portuguese and different varieties of Spanish. Moreover the book also offers new insights into non Romance languages such as English German and Quechua. **Rene Descartes' Meditations on First Philosophy in Focus** Stanley Tweyman, 2013-04-15 This volume presents the excellent and popular translation by Haldane and Ross of Descartes *Meditations on First Philosophy* an introduction by Stanley Tweyman which explores the relevance of Descartes *Regulae* and his method of analysis in the *Meditations* and six articles which indicate the diversity of scholarly opinion on the

topic of method in Descartes philosophy Focus On: 100 Most Popular Vaudeville Performers Wikipedia contributors,
 Focus On: 100 Most Popular Fantasy Anime and Manga Wikipedia contributors, *Focus-related Operations at the
Right Edge in Spanish* Iván Ortega-Santos, 2016-05-11 Syntactic movement is a pervasive phenomenon in natural language
and as such has played a key role in syntactic theorizing Nonetheless an understanding of the mechanism that allows a
constituent to appear to the right of its base generated position has remained elusive This groundbreaking research
monograph aims to address this gap in our knowledge by expanding the inventory of languages and data sets traditionally
considered in the literature Specifically Ortega Santos analyzes the interplay between focus word order and ellipsis in
Spanish A major finding that emerges from the analysis is that the tension between linearization requirements and rightward
movement is diminished by ellipsis Current debates on the syntax of the VOS order and preverbal subjects in Null Subject
Languages also figure prominently in the discussion as novel empirical evidence for the existence of null expletives is
provided a non trivial issue for our understanding of the Extended Projection Principle and subjecthood across languages

the Making of the New Europe surveys the intersection of music and nationalism by tracing its historical development and
documenting its persistence today Contrasting different types of music reveals how music expresses core ideas of
nationalism for example folk music in the nineteenth century and popular music in the twenty first **Photography and
