Science and the World's Religions Patrick McNamara Ph.D., Wesley J. Wildman, 2012-07-19 This trio of volumes contains essays that explore vital existential moral or metaphysical issues surrounding the relationship between the sciences and the world's religions In *Science and the World's Religions* experts with scientific and religious backgrounds explore vital existential or practical issues drawing on whatever sciences are relevant and engaging at least two religious traditions The multidisciplinary essays exhibit rigorous intellectual scholarly thinking but are written to clearly communicate to educated adult lay readers The first volume addresses questions about the origins and purpose of the cosmos and the human project The second volume investigates the roles of religion and spirituality in human existence considering issues ranging from the brain and religious experience to the human life cycle The third volume tackles controversies in which both religion and science are stakeholders showing how both can deepen understanding and enrich human experience Together these three books present readers with powerful tools that enable them to think through the challenge of integrating science with their religious beliefs and spiritual practices

The Origins of Science Fiction Michael Stuart Newton, 2022 A selection of science fiction tales from the close of the Romantic period to the end of the First World War It gathers together classic short stories from Edgar Allan Poe's playful hoaxes to Gertrude Barrows Bennett's feminist fantasy

The Fin-de-Siècle World Michael Saler, 2014-11-20 This comprehensive and beautifully illustrated collection of essays conveys a vivid picture of a fascinating and hugely significant period in history the Fin de Siècle Featuring contributions from over forty international scholars this book takes a thematic approach to a period of huge upheaval across all walks of life and is truly innovative in examining the Fin de Siècle from a global perspective The volume includes pathbreaking essays on how the period was experienced not only in Europe and North America but also in China Japan the Middle East Latin America Africa India and elsewhere across the globe Thematic topics covered include new concepts of time and space globalization the city and new political movements including nationalism the New Liberalism and socialism and communism The volume also looks at the development of mass media over this period and emerging trends in culture such as advertising and consumption film and publishing as well as the technological and scientific changes that shaped the world at the turn of the nineteenth century such as the invention of the telephone new transport systems eugenics and physics The *Fin de Siècle World* also considers issues such as selfhood through chapters looking at gender sexuality adolescence race and class and considers the importance of different religions both old and new at the turn of the century Finally the volume examines significant and emerging trends in art music and literature alongside movements such

as realism and aestheticism This volume conveys a vivid picture of how politics religion popular and artistic culture social practices and scientific endeavours fitted together in an exciting world of change It will be invaluable reading for all students and scholars of the Fin de Si cle period **The Cambridge History of Science Fiction** Gerry Canavan, Eric Carl

Link, 2018-12-31 The first science fiction course in the American academy was held in the early 1950s In the sixty years since science fiction has become a recognized and established literary genre with a significant and growing body of scholarship The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past Science fiction as a literary genre is the central focus of the volume but fundamental to its story is its non literary cultural manifestations and influence Coverage thus includes transmedia manifestations as an integral part of the genre s history including not only short stories and novels but also film art architecture music comics and interactive media *Science and Magic in the Modern World* Eugene Subbotsky, 2018-10-04 Science and Magic in the Modern World is a unique text that explores the role of magical thinking in everyday life It provides an excellent psychological look at the subconscious belief in magic in both popular culture and society as well as experimental research that considers human consciousness as a derivative of belief in the supernatural thus showing that our feelings emotions attitudes and other psychological processes follow the laws of magic This book synthesises the science of natural phenomena and the magic of the supernatural to present an interesting look at the juxtaposition of the inner and outer selves Fusing research into psychological disorders subconscious feelings as well as the rising presence of artificial intelligence this book demonstrates how an engagement with magical thinking can enhance one s creativity and cognitive skills Science and Magic in the Modern World is an invaluable resource for those studying consciousness as well as those looking at the effect of magical thinking on religion politics science and society **Literature and Science in the Nineteenth Century** Laura Otis, 2002-07-18 It has been said by its

opponents that science divorces itself from literature but the statement like so many others arises from lack of knowledge John Tyndall 1874 Although we are used to thinking of science and the humanities as separate disciplines in the nineteenth century that division was not recognized As the scientist John Tyndall pointed out not only were science and literature both striving to better man s estate they shared a common language and cultural heritage The same subjects occupied the writing of scientists and novelists the quest for origins the nature of the relation between society and the individual and what it meant to be human This anthology brings together a generous selection of scientific and literary material to explore the exchanges and interactions between them Fed by a common imagination scientists and creative writers alike used stories imagery style and structure to convey their meaning and to produce work of enduring power The anthology includes writing by Charles Babbage Charles Darwin Sir Humphry Davy Charles Dickens George Eliot Michael Faraday Thomas Malthus Louis

Pasteur Edgar Allan Poe Mary Shelley Mark Twain and many others and introductions and notes guide the reader through the topic s many strands ABOUT THE SERIES For over 100 years Oxford World s Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford s commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more

The Metaphysics of Science and Aim-Oriented Empiricism Nicholas Maxwell, 2019-03-09 This book gives an account of work that I have done over a period of decades that sets out to solve two fundamental problems of philosophy the mind body problem and the problem of induction Remarkably these revolutionary contributions to philosophy turn out to have dramatic implications for a wide range of issues outside philosophy itself most notably for the capacity of humanity to resolve current grave global problems and make progress towards a better wiser world A key element of the proposed solution to the first problem is that physics is about only a highly specialized aspect of all that there is the causally efficacious aspect Once this is understood it ceases to be a mystery that natural science says nothing about the experiential aspect of reality the colours we perceive the inner experiences we are aware of That natural science is silent about the experiential aspect of reality is no reason whatsoever to hold that the experiential does not objectively exist A key element of the proposed solution to the second problem is that physics in persistently accepting unified theories only thereby makes a substantial metaphysical assumption about the universe it is such that a unified pattern of physical law runs through all phenomena We need a new conception and kind of physics that acknowledges and actively seeks to improve metaphysical presuppositions inherent in the methods of physics The problematic aims and methods of physics need to be improved as physics proceeds These are the ideas that have fruitful implications I set out to show for a wide range of issues for philosophy itself for physics for natural science more generally for the social sciences for education for the academic enterprise as a whole and most important of all for the capacity of humanity to learn how to solve the grave global problems that menace our future and thus make progress to a better wiser world It is not just science that has problematic aims in life too our aims whether personal social or institutional are all too often profoundly problematic and in urgent need of improvement We need a new kind of academic enterprise which helps humanity put aims and methods improving meta methods into practice in personal and social life so that we may come to do better at achieving what is of value in life and make progress towards a saner wiser

world This body of work of mine has met with critical acclaim Despite that astonishingly it has been ignored by mainstream philosophy In the book I discuss the recent work of over 100 philosophers on the mind body problem and the metaphysics of science and show that my earlier highly relevant work on these issues is universally ignored the quality of subsequent work suffering as a result My hope in publishing this book is that my fellow philosophers will come to appreciate the intellectual value of my proposed solutions to the mind body problem and the problem of induction and will as a result join with me in attempting to convince our fellow academics that we need to bring about an intellectual institutional revolution in academic inquiry so that it takes up its proper task of helping humanity learn how to solve problems of living including global problems and make progress towards as good as wise and enlightened a world as possible
