Public Sector Leadership Petri Virtanen, Harri Jalonen, Marika Tammeaid, 2022-11-30 Drawing its origins from the Human Relations movement of the early 20th century and from public leadership orientations emphasising human aspects

human centred public leadership approaches leadership from a system's perspective. It explores societal institutions, organisations and phenomena as an emergent system structure that manifests its existence through the multilateral and reciprocal interaction of its parts. Systems thinking and the need for systemic change suggest that one can only understand and improve a system by looking at how all the parts interact with each other and how they are integrated. The systemic nature of public leadership refers to dynamic learning mechanisms as they relate to the contents of leadership development tools which are derived mainly from the changing mode of the operating environment, from the leaders' own experience, from their own personalities, from a learning by doing approach to leadership development and from the ways in which leaders learn and unlearn. This book presents key concepts, approaches, origins, applications and best practices to understand the evolution and nature of human centred approach in public leadership. It introduces a new public leadership paradigm that is needed in a complex, internationally interconnected social, economic, cultural and political environment. Based on scholarly public leadership research, in addition to the authors' professional experience as academics, managers, practitioners and consultants, this volume offers guidance for decision makers, public business and non-governmental sector leaders, managers and practitioners about how to create a context and contents for human centred leadership in the age of complex society and turbulent operating environment. It will be of value to researchers, academics and students in the fields of leadership and public management.

Enhancing Public Innovation by Transforming Public Governance Jacob Torfing, Peter Triantafyllou, 2016-08-04

Rising and changing citizen expectations, dire fiscal constraints, unfulfilled political aspirations, high professional ambitions and a growing number of stubborn societal problems have generated an increasing demand for innovation of public policies and services. Drawing on the latest research, this book examines how current systems of public governance can be transformed in order to enhance public innovation. It scrutinizes the need for new roles and public sector reforms and analyzes how the gradual transition towards New Public Governance can stimulate the exploration and exploitation of new and bold ideas in the public sector. It argues that the key to public innovation lies in combining and balancing elements from Classic Public Administration, New Public Management and New Public Governance and theorizes how it can be enhanced by multi-actor collaboration for the benefit of public officials, private stakeholders, citizens and society at large.

New Perspectives on Public Services Christopher Pollitt, 2012-01-26

The book examines two elements: place and technology that are under-researched in the public management literature. It shows how basic public services both shape and are shaped by the specifics of places and technological change by bringing together a wide range of theory and internationally comparative empirical material.
