**Catalysis Progress in Research** Fred Basolo, 2012-12-06 This conference on Catalysis was held under the auspices of the NATO Science Committee as part of its continuing effort to promote the useful progress of science through international cooperation The Science Committee Conferences are deliberately designed and structured to focus expert attention on what is not known rather than what is known The participants are carefully selected to bring together a variety of complementary viewpoints Through intensive group discussion they seek to reach agreement on conclusions and recommendations for future research which will be of value to the scientific community We believe that the endeavour has been particularly successful in the present case Some twenty five papers either in the form of reprints or specially written reviews were contributed by the participants for advance circulation to outline the state of the art in the three areas of heterogeneous homogeneous and metalloenzyme catalysis and to focus attention on key problems The availability of this background material precluded the need for lengthy introductory presentations and permitted rapid initiation of interdisciplinary discussions All participants gave generously and enthusiastically of their expertise and effort during the week of the meeting of ten long past normal bedtime hours and we extend to them our deep gratitude
