Ozone Discourse Science And Politics In Global Environmental Cooperation:

Ozone Discourses Karen Litfin, 1994 How can scientific knowledge be translated into political change Ozone Discourse examines the first global environment treaty the Montreal Protocol and its subsequent revisions which was a highly effective collaboration among scientists policymakers and activists The treaties were the work of a small group of experts who without conventional political or economic resources were able to persuade most of the world's nations to agree to reduce and then eliminate chlorofluorocarbons These experts used their understanding of atmospheric science to supplement the policymakers short term perspective with a wider intergenerational timeframe characteristic of global environmental problems Litfin argues that the discipline of international relations requires a broader conception of power in order to accommodate the knowledge based problems such as environmental degradation

misconceptions about such bodies these are often reflected in the practice of science policy bridging within international organizations such as the United Nations Offering an accessible discussion of the promises and pitfalls of SPIs the book deliberately targets a hybrid audience reaching out to both academics and practitioners By reconstructing relevant theoretical debates across different scholarly fields such as International Relations and Science and Technology Studies and by taking stock of key hands on experiences this Brief connects the theory and practice of global SPIs reflecting on the role of critical social science research as far as the interplay between science and policy in international environmental governance is concerned On the basis of a balanced analysis of the strengths and shortcomings of global SPIs this volume intends to provide readers with a faithful picture of the current international science policy landscape as well as with an informed opportunity to evaluate these institutional arrangements potential for helping to address the global environmental challenges that the world is facing today Handbook of Risk and Crisis Communication Robert L. Takao,2016-11-03 Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level community level national level and global level Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub national governments but this study examines the potential of sub national participation to make policy choices which are congruent with global strategies and national mandates This book investigates the emerging actors and new channels of Japan s environmental governance which has been taking shape within an increasingly globalized international system By analysing this important new

phenomenon it sheds light on the changing nature of Japan's environmental policy and politics and shows how the links between global strategies, national mandates and local action serve as an influential factor in Japan's changing structures of environmental governance. Further, it demonstrates that decision-making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non-state actors. It highlights a number of the problems, challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues. Finally, it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio-economic and political constraints. Demonstrating that bridging policy gaps between local action, national policy and global strategies is potentially a way of reinventing environmental policy, this book will be of interest to students and scholars of Environmental Studies, Environmental Politics and Japanese Politics.

The Social Construction of Climate Change Mary E. Pettenger, 2016-02-24 Individuals, international organizations and states are calling for the world to confront climate change. Efforts such as the Kyoto Protocol have produced intractable disputes and are deemed inadequate. This volume adopts two constructivist perspectives: norm-centred and discourse to explore the social construction of climate change from a broad theoretical level to particular cases. The contributors contend that climate change must be understood from the context of social settings and that we ignore at our peril how power and knowledge structures are generated. They offer a greater understanding of why current efforts to mitigate climate change have failed and provide academics and policy makers with a new understanding of this important topic.

Structure and Agent in the Scientific Diplomacy of Climate Change T. Skodvin, 2006-01-10 Research input constitutes a key component in the development of international environmental regime formation. Science-policy interaction is however complex and difficult, particularly because it is an encounter between two distinct systems of behaviour: the scientific ideal of impartiality and disinterestedness and the political reality of interest realisation and strategic behaviour. This study analyses the extent to which and how the institutional framework within which the science-policy dialogue takes place through conscious design can be utilised as an instrument to handle obstacles and barriers immanent of science-policy interaction and thereby serve as an instrument to enhance the effectiveness of the dialogue. Also, the impact of actor behaviour, particularly behaviour taking the form of leadership performance, is investigated. This book provides a detailed and in-depth empirical study of science-policy interaction in the Intergovernmental Panel on Climate Change (IPCC) from its establishment in 1988 to the provision of the Second IPCC Assessment Report in 1995. The main focus of the empirical investigation is on Working Group I of the IPCC.

Law in the Pursuit of Development Amanda Perry Kessaris, 2009-12-16 Law in the Pursuit of Development critically explores the relationships between contemporary principles and practice in law and development. Including papers by internationally renowned as well as emerging scholars and practitioners, the book is organized around the three liberal

principles which underlie current efforts to direct law towards the pursuit of development First that the private sector has an important role to play in promoting the public interest second that widespread participation and accountability are essential to any large scale enterprise and third that the rule of law is a fundamental building block of development This insightful and provocative collection in which contributors critique both the principles and efforts to implement them in practice will be of considerable interest to students academics and practitioners with an interest in the fields of law and development

international economic law and law and globalization **Living with Nature** Frank Fischer, Maarten Hajer, 1999-06-24

Despite the optimism of the Earth Summit held in Rio de Janeiro in 1992 the politics of environmental sustainable development has reached an impasse Why do issues of environmental protection continue to take a back seat to economic competition particularly in the international realm Once the environmental problem was widely recognised it was held that consensus could be reached In practice however the development of sustainability had often continued to merely extend earlier technocratic practices and solutions which fail to take into consideration the specific cultural questions *Living With Nature* seeks to place the question of the dynamics of environmental crisis within a socio cultural dimension of the existing economic and political institutions The book argues for a need to find a new balance between a theoretical analysis of the debate and an appreciation of local circumstances norms and knowledge Politically it implies an implicit understanding of the way in which we live together with nature *The Geopolitics Reader* Simon Dalby, Paul Routledge, Gearóid Ó

Tuathail, 2003-08-01 *The Geopolitics Reader* offers an interdisciplinary sourcebook of the most important political geographical historical and sociological readings of geopolitics in the late twentieth century The Reader is divided into five parts which draw on the most illuminating examples of imperial Cold War contemporary geopolitics new environmental themes and multiple resistances to the practices of geopolitics The editors provide comprehensive introductions and critical comment at the beginning of each part and visual geopolitical texts in the form of political cartoons are integrated throughout Encouraging exploration of divergent viewpoints of global conflict and change this invaluable compendium includes readings by Martin Luther King Vaclav Havel and George Bush **Environmentalism of the Rich** Peter

Dauvergne, 2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization Activists and policymakers have fought hard to make the earth a better place to live But has the environmental movement actually brought about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it's good that for example

Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability Sustainability Assessment Tools in Higher Education Institutions Sandra Caeiro,Walter Leal Filho,Charbel Jabbour,Ulisses M. Azeiteiro,2013-11-19 This book contributes to debates on current sustainability practices with a focus on assessment tools as applied in higher education institutions These institutions are challenged to carry out management research and teaching and to create settings that allow developing new competencies to address the complex global environmental social cultural and economic pressures with which current and future generations are confronted The first chapters discuss issues of sustainability in higher education namely the role of universities in promoting sustainability and the emergent fields of sustainability science and education for sustainable development and how to integrate and motivate sustainability into the university Subsequent chapters present examples of sustainability assessment tools specifically developed for higher education institutions such as the AISHE Auditing Instrument for Sustainability in Higher Education the GASU Graphical Assessment of Sustainability in Universities too the STAUNCH Sustainability tool for Auditing Universities Curricula in Higher Education The use of other integrated tools are also presented The papers have adopted a pragmatic approach characterized by conceptual descriptions including sustainability assessment and reorienting the curricula on the one hand and practical experiences on the other with good practices from different edges of the world Sustainability Assessment Tools in Higher Education Institutions will be of interest to graduate student lecturers researchers and those setting university policy Sustainable Agriculture Volume 2 Eric Lichtfouse,Marjolaine Hamelin,Mireille Navarrete,Philippe Debaeke,2011-02-09 This book gathers review articles that analyze current agricultural issues and knowledge then propose alternative solutions It will therefore help all scientists decision makers professors farmers and politicians who wish to build a safe agriculture energy and food system for future generations **The Law and Critical Discourse Studies** Le Cheng,David Machin,2023-10-24 This book provides a range of highly accessible approaches from Discourse Studies for analyzing legal language in legislation documents proceedings and in news media reporting In this insightful volume scholars from both Law and Linguistics come together to provide a range of approaches from Discourse Studies for analyzing legal language in legislation documents and proceedings and in

news media reporting The book begins with tackling exactly why such approaches are hugely helpful and valuable for understanding the nature of legal language and how it is used The chapters written in an accessible manner show how discourse analysis can be used to throw light on the ideas and values which can be buried in legal language The book provides a valuable resource for researchers wishing to carry out their own research or for use in teaching The Law and Critical Discourse Studies will be a key resource for academics researchers and advanced students of law language and linguistics discourse studies sociology and media and cultural studies This book was originally published as a special issue of the journal Critical Discourse Studies

The Role of `Experts' in International and European Decision-Making Processes Monika Ambrus,Karin Arts,Ellen Hey,Helena Raulus,2014-08-28 A broad gauged analysis of the issues raised by experts involvement in international and European decision making processes
