Proceedings of the Boston Area Colloquium in Ancient Philosophy John J. Cleary, Gary Gurtler, 2009-05-20 This volume contains papers and commentaries presented to the Boston Area Colloquium in Ancient Philosophy during the academic year 2007-8 The papers discuss a wide range of topics related to Plato and Aristotle On Plato topics include false pleasures in the Philebus the tripartite soul in the Republic and rhetoric in the Phaedrus and on Aristotle the relation of the physical and psychological in De Anima of virtue and happiness in the Ethics of body and nature in the Physics and the role of *phronesis* in the Metaphysics One other paper argues for the Aristotelian origin of Stoic determinism **Hellenistic Philosophy**

, 1997-12-04 This new edition of Hellenistic Philosophy including nearly 100 pages of additional materia offers the first English translation of the account of Stoic ethics by Arius Didymus substantial new sources on Epicureanism Stoicism and Scepticism expanded representation of Plutarch and Cicero and a fuller presentation of papyrological evidence Inwood and Gerson maintain the standard of consistency and accuracy that distinguished their translations in the first edition while regrouping some material into larger more thematically connected passages This edition is further enhanced by a new more spacious page design **The Birth of Hedonism** Kurt Lampe, 2014-10-26 According to Xenophon Socrates tried to

persuade his associate Aristippus to moderate his excessive indulgence in wine women and food arguing that only hard work can bring happiness Aristippus wasn't convinced Instead he and his followers espoused the most radical form of hedonism in ancient Western philosophy Before the rise of the better known but comparatively ascetic Epicureans the Cyrenaics pursued a way of life in which moments of pleasure particularly bodily pleasure held the highest value In The Birth of Hedonism Kurt Lampe provides the most comprehensive account in any language of Cyrenaic ideas and behavior revolutionizing the understanding of this neglected but important school of philosophy The Birth of Hedonism thoroughly and sympathetically reconstructs the doctrines and practices of the Cyrenaics who were active between the fourth and third centuries BCE The book examines not only Aristippus and the mainstream Cyrenaics but also Hegesias Anniceris and Theodorus Contrary to recent scholarship the book shows that the Cyrenaics despite giving primary value to discrete pleasurable experiences accepted the dominant Greek philosophical belief that life long happiness and the virtues that sustain it are the principal

concerns of ethics The book also offers the first in depth effort to understand Theodorus s atheism and Hegesias s pessimism both of which are extremely unusual in ancient Greek philosophy and which raise the interesting question of hedonism s relationship to pessimism and atheism Finally the book explores the new Cyrenaicism of the nineteenth century writer and classicist Walter Pater who drew out the enduring philosophical interest of Cyrenaic hedonism more than any other modern thinker

The Critical Review: Or, Annals of Literature Tobias Smollett, 1772

The Sense of Beauty: Being the Outlines of Aesthetic Theory George Santayana, 2022-08-01 In The Sense of Beauty Being the Outlines of Aesthetic Theory George Santayana presents a profound exploration of aesthetics delving into the intricate relationship between beauty human experience and artistic expression Written in a rich philosophical style that seamlessly blends rigorous argumentation with lyrical prose Santayana articulates his theories on beauty as a psychological and sensory phenomenon The work stands as a significant contribution to aesthetic philosophy situated within the broader intellectual context of the early 20th century when questions of beauty art and value were hotly debated amidst modernist beginnings George Santayana 1863 1952 was a philosopher poet and novelist often associated with naturalism and pragmatism His diverse background having been born in Spain and later becoming a prominent figure in American philosophy greatly influenced his worldview Santayana s keen

observations on the nature of culture and human perception informed his writing providing depth to his aesthetic theory which he positions against a backdrop of evolving artistic movements and cultural shifts For readers intrigued by the philosophical underpinnings of art and beauty *The Sense of Beauty* serves as a seminal text that encourages deep reflection on aesthetic values Santayana's insights offer not only a foundational understanding of aesthetic theory but also resonate with contemporary debates about the role of beauty in an increasingly complex world

Heritage Film Audiences Claire Monk, 2011-06-30 The concept of heritage cinema is now firmly established as an influential as well as much debated and contested critical framework for the discussion of period or historical representation in film most prominently with reference to British heritage and post heritage film successes since the 1980s but also to comparable examples from Europe North America and beyond These successes have ranged from Merchant Ivory's *A Room with a View* Maurice Howard's *End and The Remains of the Day* via Jane Austen adaptations such as Ang Lee's *Sense and Sensibility* to post heritage adaptations such as Sally Potter's *Orlando* Yet the very idea of the heritage film has rested on untested assumptions about its audiences This book breaks significant new ground in the scholarship on contemporary period films and makes a distinctive new contribution to the growing field of film audience studies by presenting the first empirically based study of the audiences for quality period films Monk engages directly with two highly contrasting sections of these audiences surveyed in the UK in the late 1990s to explore their identities their wider patterns of film taste and above all their attitudes and pleasures in relation to the period films they enjoy and on issues central to debates around the heritage film literary adaptation and cultural value with illuminating and unpredicted results

Decision Space Paul Weirich, 2001-08-27 In *Decision Space* Multidimensional Utility Analysis first published in 2001 Paul Weirich increases the power and versatility of utility analysis and in the process advances decision theory Combining traditional and novel methods of option evaluation into one systematic method of analysis multidimensional utility analysis is a valuable tool It provides formulations of important decision principles such as the principle to maximize expected utility enriches decision theory in solving recalcitrant decision problems and provides in particular for the cases in which an expert must make a decision for a group of people The multiple dimensions of this analysis create a decision space broad enough to accommodate all factors affecting an option's utility The book will be of interest to advanced students and professionals working in the subject of decision theory as well as to economists and other social scientists

Enlightenment East and West Leonard Angel, 1994-08-04 This book shows that mysticism is incomplete without scientific rationalism and that our current social and political projects cannot be completed without assimilating the values and practices of mysticism It discusses cross cultural ethics mysticism and value theory mysticism and metaphysics mysticism and the theory of knowledge ethics and religion parapsychology patriarchy and social and political history

Hume's Morality Rachel Cohon, 2008-10-02 Rachel Cohon offers an original interpretation of the moral philosophy of David Hume focusing on two areas Firstly his metaethics Cohon reinterprets Hume's claim that moral distinctions are not

derived from reason and explains why he makes it She finds that Hume did not actually hold three Humean claims 1 that beliefs alone cannot move us to act 2 that evaluative propositions cannot be validly inferred from purely factual propositions or 3 that moral judgments lack truth value According to Hume human beings discern moral virtues and vices by means of feeling or emotion in a way rather like sensing but this also gives the moral judge a truth apt idea of a virtue or vice as a felt property Secondly Cohon examines the artificial virtues Hume says that although many virtues are refinements of natural human tendencies others such as honesty are constructed by social convention to make cooperation possible and some of these generate paradoxes She argues that Hume sees these traits as prosthetic virtues that compensate for deficiencies in human nature However their true status clashes with our common sense conception of a virtue and so has been concealed giving rise to the paradoxes
