Patterns Of Fertility In Low Fertility Settings Population Studies:

PATTERNS OF FERTILITY IN LOW-FERTILITY SETTINGS. United Nations. Department of International Economic and Social Affairs, **Patterns of Fertility in Low-fertility Settings**, 1992 **The Changing Face of Canada** Roderic P. Beaujot, Donald W. Kerr, 2007 Canadian society is rapidly changing This concise up to date volume masterfully captures this change Edited by two of Canada's leading demographers Roderic Beaujot and Don Kerr this book is an exciting entry in Canadian population studies drawing from a variety of disciplines including sociology geography economics history and epidemiology The Changing Face of Canada is an essential text for demography courses across the country Each reading has been meticulously edited and concisely ordered into five essential sections fertility mortality international migration domestic migration and population distribution population aging population composition Vital issues include the role of immigration in Canada's future the deteriorating economic welfare of immigrants globalization undocumented migration and unwanted refugees Aboriginal population change implications of unprecedented low fertility and the astonishing demographic transformation of Canadian cities **Partnership and Reproductive Behaviour in Low-fertility Countries** United Nations. Department of Economic and Social Affairs. Population Division, 2003 The number of countries where the total fertility rate is below 2.1 children per woman increased more than ten fold during the last four decades This report focuses on the influence of marital or partnership behaviour on fertility levels and trends resulting in below replacement fertility Social trends considered include increasing cohabitation higher age of first marriage higher proportions of never married women over age 30 and the rapid fall in the marriage rate in the 1990s While all low fertility societies share fundamental societal features many of their socio economic and cultural features vary and thus shape the differences of demographic characteristics Contemporary Issues in Family Studies Angela Abela, Janet Walker, 2013-10-02 This volume tackles key issues in the changing nature of family life from a global perspective and is essential reading for those studying and working with families Covers changes in couple relationships and the challenges these pose parenting practices and their implications for child development key contemporary global issues such as migration poverty and the internet and their impact on the family and the role of the state in supporting family relationships Includes a stellar cast of international contributors such as Paul Amato and John Coleman and contributions from leading experts based in North Africa Japan Australia and New Zealand Discusses topics such as cohabitation divorce single parent households same sex partnerships fertility and domestic violence Links research and practice and provides policy recommendations at the end of each chapter Research Handbook on the Sociology of the Family Norbert F. Schneider, Michaela Kreyenfeld, 2021-06-25 Exploring how family life has radically changed in recent decades this comprehensive Research Handbook tracks the latest developments and trends in scholarly work on the family With a particular focus on the European context it addresses current debates and offers insights into key topics including the division of housework family forms and living arrangements intergenerational relationships

Low Fertility, Institutions, and their Policies Ronald R. Rindfuss, Minja Kim Choe, 2016-06-16 This volume examines ten economically advanced countries in Europe and Asia that have experienced different levels of fertility decline It offers readers a cross country perspective on the causes and consequences of low birth rates and the different policy responses to this worrying trend The countries examined are not only diverse geographically historically and culturally but also have different policies and institutions in place They include six very low fertility countries Austria Czech Republic Hungary Italy Spain and Taiwan and four that have close to replacement level fertility United Kingdom Norway Canada and France Although fertility has gone down in all these countries over the past 50 years the chapters examine the institutional policy and cultural factors that have led some countries to have much lower fertility rates than others In addition the final chapter provides a cross country comparison of individual perceptions about obstacles to fertility based on survey data and government support for families This broad overview along with a general introduction helps put the specific country papers in context As birth rates continue to decline there is increasing concern about the fate of social welfare systems including healthcare and programs for the elderly This book will help readers to better understand the root causes of such problems with its insightful discussion on how a country's institutions policies and culture shape fertility trends and levels

Routledge Handbook of Families in Asia Stella R. Quah, 2015-03-24 Research on the family has expanded considerably across Asia but studies tend to be fragmented focusing on narrow issues within limited areas cities towns small communities and may not be accessible to international readers These limitations make it difficult for researchers students policy makers and practitioners to obtain the information they need The Routledge Handbook of Families in Asia fills that gap by providing a current and comprehensive analysis of Asian families by a wide range of experts in a single publication The thirty two chapters of this comparative and multi disciplinary volume are organized into nine major themes conceptual approaches methodological issues family life in the context of culture family relationships across the family life cycle issues of work and income stress and conflict family diversity family policy and laws and environmental setting of homes Each chapter examines family life across Asian countries studying cultural similarities and differences and exploring how families are changing and what trends are likely to develop in the future To provide a fruitful learning experience for the reader each chapter offers examples relevant data and a comprehensive list of references Offering a complete interdisciplinary overview of families in Asia the Handbook will be of interest to students academics policy makers and practitioners across the disciplines of Asian Studies Sociology Demography Social Work Law Social Policy Anthropology Geography Public Health and Architecture Understanding Family Change and Variation Jennifer A.

Johnson-Hanks, Christine A. Bachrach, S. Philip Morgan, Hans-Peter Kohler, 2011-08-27 Fertility rates vary considerably across and within societies and over time Over the last three decades social demographers have made remarkable progress in documenting these axes of variation but theoretical models to explain family change and variation have lagged behind At the same time our sister disciplines from cultural anthropology to social psychology to cognitive science and beyond have made dramatic strides in understanding how social action works and how bodies brains cultural contexts and structural conditions are coordinated in that process Understanding Family Change and Variation Toward a Theory of Conjunctural Action argues that social demography must be reintegrated into the core of theory and research about the processes and mechanisms of social action and proposes a framework through which that reintegration can occur This framework posits that material and schematic structures profoundly shape the occurrence frequency and context of the vital events that constitute the object of social demography Fertility and family behaviors are best understood as a function not just of individual traits but of the structured contexts in which behavior occurs This approach upends many assumptions in social demography encouraging demographers to embrace the endogeneity of social life and to move beyond fruitless debates of structure versus culture of

agency versus structure or of biology versus society

India's Perception, Society, and Development Arup

Maharatna,2013-05-09 There has been of late a growing realisation that the pace and pattern of economic development of a country can hardly be understood and explained comprehensively in terms of the straitjacket of economics discipline alone India is a prime example of the importance of the part played by a country s history culture sociology and socio cultural religious norms values and institutions in its development process This book with its assorted essays of varying depths of scholarship and insightful reflections attempts to drive home this point more forcefully than ever before In its search for the non economic roots of India s overall sloth and murky progress in its broad based economic and human development the book illuminates major oddities deep inside a unique mental make up full of perceptual and ideational dilemmas many of which are arguably shaped by the long lasting and dominant influence of what could be called the Brahminical lines of thinking and discourse With India s hazy and dodgy world of perceptions as a backdrop the book also addresses through its intelligent essays the deep and sometimes dire ramifications of the historic advent and the dramatic advance of neoliberal market ideology today
