AIDS, Politics, and Music in South Africa Fraser G. McNeill, 2011-10-31 This book offers an original anthropological approach to the AIDS epidemic in South Africa demonstrating why AIDS interventions in the former homeland of Venda have failed and possibly even been counterproductive It does so through a series of ethnographic encounters from kings to condoms which expose the ways in which biomedical understanding of the virus have been rejected by and incorporated into local understandings of health illness sex and death Through the songs of female initiation AIDS education and wandering minstrels the book argues that music is central to understanding how AIDS interventions operate This book elucidates a hidden world of meaning in which people sing about what they cannot talk about where educators are blamed for spreading the virus and in which condoms are often thought to cause AIDS The policy implications are clear African worldviews must be taken seriously if AIDS interventions in Africa are to become successful

Premenstrual Syndrome Benson Ginsburg, 2012-12-06 As the work on a revised edition of the Diagnostic and Statistical Manual OSM IIIR progressed a great controversy grew over the inclusion of a new diagnostic category Premenstrual Phase Dysphoric Disorder Some nosologists and scientists who study premenstrual syndrome PMS felt that while a specific psychiatric disorder does exist it occurs relatively rarely The disorder can be characterized by recurrent periods of dysphoria on a monthly basis in synchrony with the menstrual period PMS already exists as a diagnosis in ICD 9 the international medical nomenclature The category for DSM IIIR was to be a specific psychiatric disorder concentrating on the dysphoric reaction and not including all of the physical and mental symptoms that people have ascribed to this condition Much of the controversy that ensued had little to do with the diagnostic category or the condition itself Rather it concerned feelings voiced by feminist groups that the new diagnostic category would be misleading that it would inappropriately label women as mentally ill and that it would be affixed not only to the dysphoric disorder but everything else that happens psychiatrically to women
