Political Ascent Contemporary Islamic Movements In North Africa:

Political Ascent Emad Eldin Shahin, 2018-02-23 Islamic movements in North Africa have historically been distinguished from their counterparts in other parts of the Arab world because they have demonstrated a marked willingness to work within the political system and have at times even been officially recognized and allowed to participate in local and national elections. As a result, Islamic thinkers from the Maghrib have produced important writing about the role of Islam and the state, democracy and nonviolent change. In this book, Emad Shahin offers a comparative analysis of the Islamic movements in Algeria, Tunisia and Morocco, exploring their formation and expansion in the late 1960s and the tenets of their ideology for social transformation. Islamic movements in North Africa have historically been distinguished from their counterparts in other parts of the Arab world because they have demonstrated a marked willingness to work within the political system and have at times even been officially recognized and allowed to participate in local and national elections. As a result, Islamic thinkers from the Maghrib have produced important writing about the role of Islam and the state, democracy and nonviolent change. In this book, Emad Shahin offers a comparative analysis of the Islamic movements in Algeria, Tunisia and Morocco, exploring the roots of their development, the nature of their dynamics and the tenets of their ideology. He argues that the formation and expansion of Islamic movements since the late 1960s has come in response to the marginalization of Islam in state and society and to a perceived failure of imported models of development to resolve socioeconomic problems or to incorporate the Muslim belief system into a workable plan for social transformation. **The Resurgence of Religion** David S.

Zeidan, 2018-11-13 This book is a comparative study of basic themes in Christian and Islamic fundamentalist discourses, analyzing and comparing texts from a wide variety of fundamentalist leaders and movements, looking for family resemblances and significant differences in order to better understand the contemporary phenomenon of religious resurgence. After placing fundamentalisms in a theoretical framework, the study looks at selected themes important to fundamentalists, noting resemblances and differences. These themes include their anti-secularist stance, their theocentric worldviews, their reliance on inerrant sacred scriptures and their attitudes to politics, government, state and democracy. The study also looks at the fundamentalist view of the world as a perennial battlefield between the forces of good and those of evil in the realm of ideologies as well as politics and the legitimization of violence. **Religion in International Relations Theory** Nukhet

Sandal, Jonathan Fox, 2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics. The Iranian Revolution, the September 11 attacks, the ethno-religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs. The rise of religious political parties across the world, ranging from the Christian Democrats in Europe to the Bharatiya Janata Party in India, similarly illustrated religion's heightened international profile. Despite all this attention, it is challenging to situate religion within a discipline which has been dominantly secular from its inception. Only a few existent

works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel

The Tunisian Revolution and Democratic Transition Mohammad Dawood Sofi, 2021-11-29 Drawing on the history of post independence Tunisia the book studies the evolution of al Nah ah as a political party in Tunisia and its role in a protracted struggle to shape the post authoritarian order along democratic lines It explores al Nah ah s relationship with the Tunisian state society and beyond that resulted in shaping its fluctuating expressions of ideology and practices State repression political participation or internal differentiation among other factors place an Islamic movement in this case al Nah ah in such a situation that demands a perpetual self re evaluation as well as implementation of ideology objectives and political programmes The study explains how the socio political setting in Tunisia demanded various ideologically opposite currents Islamic liberal or leftist to endure cross ideological cooperation either to contest authoritarian regimes or to engage in the political process It more importantly analyzes the trajectory of a gradual democratization process in the country and provides evidence explaining the impact and importance of a vibrant civil society building alliances and sharing of power The book provides comparative analytical attention to the primary sources on these issues to create a critical historiography It thus adds to the body of literature on the state society and politics in the MENA region and particularly targets students scholars and social scientists interested in understanding the nature of power and politics in Tunisia and beyond

Young Islam Avi Max Spiegel, 2017-03-14 How the competition for young recruits is creating rivalries among Islamists today Today two thirds of all Arab Muslims are under the age of thirty Young Islam takes readers inside the evolving competition for their support a competition not simply between Islamism and the secular world but between different and often conflicting visions of Islam itself Drawing on extensive ethnographic research among rank and file activists in Morocco Avi Spiegel shows how Islamist movements are encountering opposition from an unexpected source each other In vivid and compelling detail he describes the conflicts that arise as Islamist groups vie with one another for new recruits and the unprecedented fragmentation that occurs as members wrangle over a shared urbanized base Looking carefully at how political Islam is lived expressed and understood by young people Spiegel moves beyond the top down focus of current research Instead he makes the compelling case that Islamist actors are shaped more by their relationships to each other than by their relationships to the state or even to religious ideology By focusing not only on the texts of aging elites but also on the voices of diverse and sophisticated Muslim youths Spiegel exposes the shifting and contested nature of Islamist movements today movements that are being

reimagined from the bottom up by young Islam The first book to shed light on this new and uncharted era of Islamist pluralism in the Middle East and North Africa Young Islam uncovers the rivalries that are redefining the next generation of political Islam Denial of Sanctuary Michael A. Innes, 2007-06-30 The war on terror's emphasis on denying sanctuary and safe havens to terrorists has placed a premium on physical territory from mountain caves and frontier hideouts to the bordered world of modern states Denial of Sanctuary highlights the limits of conventional thinking on the subject and suggests new approaches to understanding this complex and misunderstood feature of modern conflict Critics of the war on terror have pointed to the futility of waging war on a tactic Its emphasis on denying sanctuary and safe havens to terrorists rooted primarily in traditional counterinsurgency theory and poorly conceptualized policy statements has placed a premium on physical territory from mountain caves and frontier hideouts to the bordered world of modern states To fully understand sanctuaries is to uncover the problems and pitfalls of waging war on locations exposing the secret lives of multiple hidden worlds filled with extremists criminals soldiers and spies with the pious and the profane with dangers that lie below the surface and in the margins As this volume makes abundantly clear such a murky underground is far more complex and varied than the conventional wisdom suggests Terrorists have hidden in plain sight in modern cities used advanced communications technology to build virtual refuges crafted militant enclaves out of the disarray of failed states flocked to distinctly unsafe insurgent battlespaces and generally challenged the protective limits of law citizenship and state Denial of Sanctuary brings together top experts in the field to expand the debate to explore the roots causes and consequences of the problem and to clarify our understanding of sanctuary in terrorist thought and practice *Rethinking Islamism beyond jihadi violence* Elisa Orofino, 2023-05-23 For several years now Islamism has been associated with jihadism and violent extremism both in academia and in contemporary political debates However this association can be misleading Islamism has much deeper roots than jihadi terrorism and it stands as a powerful and complex ideology inspiring thoughts actions and groups all over the world Emerging as a protest for justice ideology claiming freedom against Western colonisation of the Muslim world Islamism has triggered both individuals and groups worldwide since the early 1900s Almost as a sacred ideology based on the need to revive Islam as the only saving grace for Muslims around the world Islamism started to be widely associated with jihadism after 9 11 Before then Islamism was not automatically related to terrorism but to resistance Given that terrorists are only a small and definite portion of Islamists this volume aims to refocus research on Islamism beyond jihadism by collecting relevant contributions on Islamist but non violent organisations More precisely this volume innovatively contributes to current academic debates by exploring the origins of Islamism and the differences between jihadism the evolution of Islamism over time and places and the role played by the most influential non jihadist Islamist organisations active today as powerful non state actors **Historical Dictionary of Arab and Islamic Organizations** Frank Clements, 2001 Unity is an often heard word in Arab and Islamic circles This historical dictionary seeks to show that along with the underlying sources

of unity there are also sources of division in these groups Unlike other volumes in this series this volume focuses not only on the organizations but also on the key countries and figures of the region Includes o An explanatory introduction o List of Acronyms o Chronology o Bibliography *Rethinking Islamist Politics* Salwa Ismail, 2006-05-26 In an atmosphere of growing concern over the threat posed by Islamist violence political Islamism has become the most important of geopolitical issues In the process it has been misrepresented Contrary to what many believe Islamist movements are characterised by their diversity Revisiting the main arguments and explanations that have been used over the past twenty years to understand Islamist activism moderate as well as militant Salwa Ismail here proposes a rethinking of Islamist politics The phenomenon of political Islam is determined by macro and micro level changes in the Muslim world such as the retreat of the welfare state across the Middle East and the subsequent expansion in the role of informal political activists in the popular neighbourhoods of such cities as Algiers or Cairo Ismail examines both levels to explain the socio economic and political settings out of which Islamism has developed Her focus is both the economic and political environments that fomented Islamism and the structures of Islamist movements themselves from their ideologies to their modes of action Looking at Islamism as a form of contestation politics Ismail offers a reassessment of its failures and successes limited as it is by its use of violence but capable of real mobilisation at a popular level *Rethinking Islamist Politics* will be vital reading for anyone seeking to understand such spectacular expressions of Islamism as the September 11th attacks but also the everyday struggles of ordinary people which Islamism embodies **Historical Dictionary of Arab and Islamic Organizations** Sarah Tenney, 2020-10-28 The *Historical Dictionary of Arab and Islamic Organizations* focuses on international and regional organizations primarily in the Middle East and North Africa MENA region With more than 300 cross referenced entries this volume includes both major and minor organizations While the emphasis is on intergovernmental institutions it also covers non governmental organizations key countries movements and prominent figures in the Arab and Islamic world Like other dictionaries of this type it includes an introductory essay chronology of major events and a select bibliography for further reading It provides a solid starting point for students researchers and anyone wanting to know more about the subject
