Prescription For Leadership Training For The Medical Elite Observations:

Prescription for Leadership Stephen J. Miller, 1970 *Prescription for Leadership* Stephen J. Miller, 1970 **A Second Chicago School?** Gary Alan Fine, 1995-09 From 1945 to about 1960 the University of Chicago was home to a group of faculty and graduate students whose work has come to define what many call a second Chicago School of sociology. Like its predecessor earlier in the century, the postwar department was again the center for qualitative social research on everything from mapping the nuances of human behavior in small groups to seeking solutions to problems of race, crime, and poverty. Howard Becker, Joseph Gusfield, Herbert Blumer, David Riesman, Erving Goffman, and others created a large, enduring body of work. In this book, leading sociologists critically confront this legacy. The eight original chapters survey the issues that defined the department's agenda: the focus on deviance, race, and ethnic relations; urban life and collective behavior; the renewal of participant observation as a method; and the refinement of symbolic interaction as a guiding theory. The book also discusses the professional and institutional factors that shaped this generation, including the leadership of Louis Wirth and Everett C. Hughes, the role of women, and the competition for national influence. Chicago sociology faced from survey research at Columbia and grand theory at Harvard. The contributors also discuss the internal conflicts that call into question the very idea of a unified school.

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1970 First multi-year cumulation covers six years 1965-70 **The Medical Elite** Stephen Miller, 2017-07-05 In the tradition of C. Wright Mills, Stephen J. Miller defines and analyzes the power of the medical elite in American elite. He describes a group of interns who are becoming the successors of the physicians who determine the character of medicine in a complex society. The group is at the Harvard Medical Unit of the Boston City Hospital, and its members are heirs apparent to the elite of the medical profession. Miller spent more than a year living with these interns. He observed them as they worked on the wards in clinics and on the accident floor. He interviewed interns, administrators, teachers, researchers, and other personnel at the university-affiliated hospital. He describes how members of the elite are chosen and promoted, discusses what makes them elite, and demonstrates how they maintain their elite status. In the course of his analysis, he describes fully the training of these young physicians and how their internship prepares them for the future role in medicine. The thrust of the book is to document the training of interns in a big city hospital and to describe the operations and self-perpetuating tactics of the elite. The best or the elite of the medical profession, explains Miller, are teachers and researchers at medical schools and particularly those at name schools and their affiliated hospitals. More than half of those who served in the internship program went on to become professors, deans, chairmen, and administrators in those institutions. The author describes how interns serve the purpose of the elite: they may someday join them; they provide the bulk of the medical care at the hospital, and by so doing free the researchers so that they are able to spend more time in the laboratory. While much of what interns do is everyday tasks of caring for patients, those who serve such internships are taking the first step on a route that leads to membership in the medical elite. *The*
