Emerging Perspectives on Teaching Architecture and Urbanism David Leite Viana,Emílio da Cruz

Brandão,Franklin Morais,Isabel Cristina Carvalho,José P. Duarte,Nicolau Brandão,2023-11-17 This book contains a set of essays on the teaching of Architecture and Urbanism written by university professors and researchers from several countries It argues that the teaching of architecture and urbanism is in a state of crisis architecture seems unable to respond to current problems and urbanism seems incapable of fulfilling the needs of a more balanced society and its built environment including the human right to housing The book comprises historical analyses systematization of concepts manifestos and social evaluations and above all an alignment of new objectives curricular plans and pedagogical methodologies *The*

Figure of Knowledge Sebastiaan Loosen,Rajesh Heynickx,Hilde Heynen,2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to **Splintering Urbanism** Steve

Graham,Simon Marvin,2002-09-11 *Splintering Urbanism* makes an international and interdisciplinary analysis of the complex interactions between infrastructure networks and urban spaces It delivers a new and powerful way of understanding contemporary urban change bringing together discussions about globalization and the city technology and society urban space and urban networks infrastructure and the built environment developed developing and post communist worlds With a range of case studies illustrations and boxed examples from New York to Jakarta Johannesburg to Manila and Sao Paolo to Melbourne *Splintering Urbanism* demonstrates the latest social urban and technological theories which give us an understanding of our contemporary metropolis *Intertwining*: Steven Holl,1996-04 To his earlier articulated concept of

anchoring which connects a construction with the history of the ground locale and region Holl adds the concept of intertwining which is illuminated by sensory perceptual conceptual and emotional experiences Illustrates with drawings plans and photographs projects in Japan Finland Germany Switzerland Holland Korea and Norway No index Annotation

copyright by Book News Inc Portland OR **Urban Landscape Perspectives** Giovanni Maciocco,2008-02-01 *Urban Landscape Perspectives* explores how landscape terminology can be usefully brought into the urban debate The articles are by scholars who have a particular interest in and experience of the city project at various operative scales They include

theoretical reflections on the landscape as an eminently project like figure The book describes new methods and approaches dealing with the contemporary environment whether it is from the point of view of the city or the landscape **Planting New Towns in Europe in the Interwar Years** Helen Meller, Heleni Porfyriou, 2016-06-22 The key theme of the papers in this book concerns the prospects of building new urban environments and creating new societies in Europe during the interwar years The contributions do not focus on the system of government communist fascist or democratic but rather on what actually got built by whom and why and how the international communication of ideas was filtered through the prism of local concerns and culture As such the volume serves to tease out connections between urban form and social aspirations and between the moral basis of social planning and how it was interpreted Did the new towns of the interwar years actually create a planned society where visions met realities aided by the design of new urban forms This is one of the principal questions investigated by the contributors here in all the different political contexts of their chosen new towns

Architectural Theories of the Environment Ariane Lourie Harrison, 2013-03-05 As architects and designers we struggle to reconcile ever increasing environmental humanitarian and technological demands placed on our projects Our new geological era the Anthropocene marks humans as the largest environmental force on the planet and suggests that conventional anthropocentric approaches to design must accommodate a more complex understanding of the interrelationship between architecture and environment Here for the first time editor Ariane Lourie Harrison collects the essays of architects theorists and sustainable designers that together provide a framework for a posthuman understanding of the design environment An introductory essay defines the key terms concepts and precedents for a posthuman approach to architecture and nine fully illustrated case studies of buildings from around the globe demonstrate how issues raised in posthuman theory provide rich terrain for contemporary architecture making theory concrete By assembling a range of voices across different fields from urban geography to critical theory to design practitioners this anthology offers a resource for design professionals educators and students seeking to grapple the ecological mandate of our current period Case studies include work by Arakawa and Gins Arons en Gelauff Casagrande The Living Minifie van Schaik R Sie n SCAPE Studio Gang and xDesign Essayists include Gilles Cl ment Matthew Gandy Francesco Gonz les de Canales Elizabeth Grosz Simon Guy Seth Harrison N Katherine Hayles Ursula Heise Catherine Ingraham Bruno Latour William J Mitchell Matteo Pasquinelli Erik Swynedouw Sarah Whatmore Jennifer Wolch Cary Wolfe and Alben Yaneva **Architecture from the Outside** Elizabeth Grosz, 2001-06-22 Essays at the intersection of philosophy and architecture explore how we understand and inhabit space To be outside allows one a fresh perspective on the inside In these essays philosopher Elizabeth Grosz explores the ways in which two disciplines that are fundamentally outside each another architecture and philosophy can meet in a third space to interact free of their internal constraints Outside also refers to those whose voices are not usually heard in architectural discourse but who inhabit its space the destitute the homeless the sick and the dying as well as women and minorities Grosz asks how we can

understand space differently in order to structure and inhabit our living arrangements accordingly Two themes run throughout the book temporal flow and sexual specificity Grosz argues that time change and emergence traditionally viewed as outside the concerns of space must become more integral to the processes of design and construction She also argues against architecture s historical indifference to sexual specificity asking what the existence of at least two sexes has to do with how we understand and experience space Drawing on the work of such philosophers as Henri Bergson Roger Caillois Gilles Deleuze Jacques Derrida Luce Irigaray and Jacques Lacan Grosz raises abstract but nonformalistic questions about space inhabitation and building All of the essays propose philosophical experiments to render space and building more mobile and dynamic
