Coleman, Ann O'Hanlon, 2017-02-03 The psychology of aging usually focuses upon cognitive changes with a particular focus on dementia and other forms of cognitive decline But getting older is about more than simply changes to the brain and related health issues Changes to our social and emotional lives are also hugely significant as we adapt across our lifespan The second edition of *Aging and Development* is the only textbook available that responds to the growing interest in social personal and emotional development in older age Ideally suited to complement texts on cognitive change the book provides a holistic developmental perspective on aging It highlights a range of issues including the development of personal meaning and spirituality improvements in emotional control uses of reminiscence and life review the importance of healthy attitudes to aging as well as the maintenance of close personal relationships It does not avoid the difficult issues of late life decline but

illustrates how even in circumstances of physical and mental frailty a positive sense of self can be created and enhanced Fully updated to provide the most cutting edge overview on this burgeoning topic of interest Aging and Development includes a glossary and list of useful websites both on the study of gerontology and the psychology of aging It will be essential reading for all students of developmental psychology as well as anyone either training to work or already working with older people

Aging and Development Ann O'Hanlon, Peter Coleman, 2018-04-17 With increasing numbers of the population living into old age we need a better understanding of the nature and experience of ageing in all its aspects Up to now very few texts have considered this in any depth but Ageing and Development a new volume in the Texts in Developmental Psychology series provides a detailed and comprehensive overview of the theories and research in adult development into old age The classic early accounts of theorists such as Jung and Erikson are considered as well as their present day successors Particular attention is given to theories of adjustment to loss and to the threat of loss which dominate current gerontological research A notable feature of the book is the separate section devoted to the psychology of advanced old age to life in states of physical and or mental frailty and to the survival of the self in these circumstances There is a strong emphasis throughout on up to date empirical research and illustrative case examples The reader is constantly encouraged to take a critical perspective to understand the strengths and limitations of different studies and to think about the issues raised in terms of their own lives
