Presidential Selection Theory And Development:

Presidential Selection James W. Ceaser, 1979-06-21 Examining the development of the process of presidential selection from the founding of the republic to the present day James Ceaser contends that many of the major purposes of the selection system as it was formerly understood have been ignored by current reformers and modern scholars In an attempt to reverse this trend Professor Ceaser discusses the theories of selection offered by leading American statesmen from the Founders and Thomas Jefferson to Martin Van Buren and Woodrow Wilson From these theories he identifies a set of criteria for a sound selection system that he then uses to analyze and evaluate the recent changes in the selection process Five normative functions of a presidential selection system comprise the author's criteria it should minimize the harmful effects of ambitious contenders for the office promote responsible executive leadership and power help secure an able president ensure a legitimate accession and provide for an appropriate amount of choice and change Professor Ceaser finds that the present system is characterized by weak parties and candidate centered campaigns that lead to the problems of image politics and demagogic leadership appeals He therefore argues for a more republican selection system in which political parties would be strengthened to serve as a restraining force on popular authority public opinion and individual aspirations for executive power

The Presidential Republic Gary L. Gregg, 1997 For two centuries American presidents have considered themselves to be representatives of the American people In this detailed study of presidential representation Gary Gregg explores the theory history and consequences of presidents acting as representatives in the American political system Gregg explores questions such as what it means to be a representative how the Founding Fathers understood the place of the presidency in the Republic established by the Constitution and the effects a representational presidency has on deliberative

democracy This important examination of the presidency's place in our political system is essential reading for those interested in American political theory constitutional studies and American history *The Idea of Presidential Representation* Jeremy D. Bailey, 2019-07-23 Does the president represent the entire nation Or does he speak for core partisans and narrow constituencies The Federalist Papers the electoral college history and circumstance from the founders time to our own all factor in theories of presidential representation again and again lending themselves to different interpretations This back and forth Jeremy D Bailey contends is a critical feature not a flaw in American politics Arriving at a moment of great debate over the nature and exercise of executive power Bailey's history offers an invaluable remarkably relevant analysis of the intellectual underpinnings political usefulness and practical merits of contending ideas of presidential representation over time Among scholars a common reading of political history holds that the founders aware of the dangers of demagoguery created a singularly powerful presidency that would serve as a check on the people's representatives in Congress then this theory goes the Progressives impatient with such a counter majoritarian approach reformed the presidency to better reflect the people's will and they reasoned advance the public good The Idea of Presidential Representation challenges this consensus offering a more nuanced view of the shifting relationship between the president and the American people Implicit in this pattern Bailey tells us is another equivocal relationship that between law and public opinion as the basis for executive power in republican constitutionalism Tracing these contending ideas from the framers time to our own his book provides both a history and a much needed context for our understanding of presidential representation in light of the modern presidency In *The Idea of Presidential Representation* Bailey gives us a new and useful sense of an enduring and necessary feature of our politics **(S)electing the President** Michael L. Mezey, 2017-07-06 Looking at two salient characteristics of our current environment the declining influence of political parties the communication revolution via the internet social media and cable television and the impact of money this book asks whether our now fully democratized presidential selection process has diminished the quality of our presidential candidates and the campaigns they run whether the turn to demagoguery that the Founders feared has materialized what the consequences of our presidential selection process have been for American government and whether it would be valuable to rethink our wholehearted commitment to popular election of the President Rethinking Presidential Constructions of Constitutional Regimes Richard Alexander Izquierdo, 2011 ABSTRACT This dissertation assesses the design and incentive structures that link the presidency to constitutional maintenance and renewal when extraordinary times occur and posits that institutional power and historical context were priced into the presidency since its creation This finding has robust implications for understanding the presidency's role in constitutional change and in particular the construction of constitutional regimes Presidents are naturally drawn to the lure of constructing a constitutional regime by the nature of the office as presidents want to constitutionalize their priorities from rival political interests in order to secure their legacy Some fortunate

presidents aided by historical context actually get the opportunity to do so After providing a theory of the presidency's role within the constitutional order and its incentive structures the study then builds upon these insights to construct a coherent model that assesses the dynamics between presidential leadership and historical context in the construction of constitutional regimes The research finds that there exists an inverse relationship between the degree of constitutional change and the president's role in initiating it The reason for this inverse dynamic is that extraordinary historical events crowd out the space typically reserved for executive leadership whenever they come to the fore Conversely the less extensive the degree of constitutional change the greater that presidential leadership plays a role in the process Reconstructive presidents are actually reactive at the level of constitutional politics despite the high praise political commentators offer to this most select group of presidents Their presidencies' collective effects on constitutional change have been greatly aided perhaps overwhelmingly destined for success at the constitutional level due to exogenous factors beyond their control The coalitional political shifts in electoral support seen during these transformative periods are just a byproduct of massive historical events Presidential leadership is important but not in the actual initiation of the constitutional construction despite the institutional inclination of presidents to chart new paths A reconstructive president chooses a set of principles ideology or commitments with which to define the content of the new regime in place but his autonomy here is limited to providing a substantive constitutional vision not the sort of initial decisive action typically associated with leadership efforts If the analysis of presidents was confined to nameless faceless institutional actors engaged in the quest for constitutional regime construction the greatest difference between the efforts of similarly situated presidents would be in the substantive content that each provided to his historic opportunity Presidential greatness at the constitutional level would not be determined by unusual skill in turning a normal opportunity into a transformative one or in providing a constitutional opening where none was to be found While the constitutional space opened by historical events crowds out the space for autonomous action by reconstructive presidents the reverse is true for presidents with a more limited constitutional opening Presidents constrained by contextual factors must exercise more extensive leadership skills in attempting any efforts to influence constitutional meaning Since non-reconstructive presidents' openings are smaller their efforts have to be much more exacting and tactical even though their payoffs are irredeemably smaller than those of reconstructive presidents Therefore non-reconstructive presidents provide the elegance to the model of constitutional construction in that they show how presidential forays into constitutional politics exist within a continuum Presidential leadership is more institutionally creative and by necessity more entrepreneurial at the narrowest openings of constitutional space while it is least in display because less necessary at the level of reconstructive politics where the constitutional space is broadest The theoretical insight of this research therefore concludes that there exists an inverse relationship between presidential leadership and historical context in the construction of constitutional regimes

Presidential Elections and Majority Rule Edward B. Foley, 2020 In his latest book

Presidential Elections and Majority Rule Edward Foley asks how the American electoral system can better represent the people What kind of winner truly reflects the nation s votes the plurality winners of winner takes all elections as currently used or the majority preferred winners of a reformed system How do third party candidates affect American presidential elections What if anything would change in a two candidate run off And how can electoral reform be implemented without sowing chaos Ultimately Foley outlines a solution in which the Electoral College can be restored to its original majoritarian ideals through state law rather than Constitutional amendment **The Rhetorical Presidency** Jeffrey Tulis,2017-11-07
