Reconstructing Wartorn Societies Afghanistan:

Reconstructing War-Torn Societies Sultan Barakat, 2004-03-04 As international attention focuses on the rebuilding of Afghanistan this collection looks critically at the evolution and meaning of the core concepts underpinning aims and strategies for recovery the key role of institutional development and capacity building in establishing good governance based on collaboration between state civil society and market the empirical consensus over many decades for best practice in development the acknowledgement that recovery of war torn societies is a development challenge It is also shown that despite this understanding operational practice continues to contradict these principles and lessons learned from proven experience *Reconstructing Post-Saddam Iraq* Sultan Barakat, 2007-08-16 Previously published as a special issue of Third World Quarterly this volume seeks to analyze to what extent the controversial US policy of democratizing the Middle East with pre emptive invasions was justified or effective Post 9 11 the US developed a policy of War on Terror taking the decision to democratize the Middle East with pre emptive in **Afghanistan** C. Heather Bleaney, María Ángeles Gallego, 2006 Presents a thematically indexed bibliography devoted to Afghanistan Following the pattern established by one of its major data sources viz the acclaimed Index Islamicus both journal articles and book publications are included and indexed

Beyond Reconstruction in Afghanistan J. Montgomery, D. Rondinelli, 2004-04-23 The interaction of failed states terrorism and the need for nation building is at the top of the international agenda with particular focus on Afghanistan and Iraq This path breaking collection brings together top analysts to examine the goals and challenges facing efforts to reconstruct states that have collapsed into anarchy or have been defeated in war Drawing on lessons from 50 years of past experience with post conflict reconstruction and development around the world the authors provide historical context identify difficulties that can impede progress and recognize the realistic limitations of ambitions to create new states They assess ongoing development plans in a country devastated by more than a century of conflict Throughout particular attention is paid to the interaction of the goals of external and domestic actors highlighting the importance of understanding the internal social economic and political environment of the society receiving assistance **Occupational Hazards** David M. Edelstein, 2011-07-20 Few would contest that the U S occupation of Iraq is a clear example of just how fraught a military occupation can become In *Occupational Hazards* David M Edelstein elucidates the occasional successes of military occupations and their more frequent failures Edelstein has identified twenty six cases since 1815 in which an outside power seized control of a territory where the occupying party had no long term claim on sovereignty In a book that has implications for present day policy he draws evidence from such historical cases as well as from four current occupations Bosnia Kosovo Afghanistan and Iraq where the outcome is not yet known Occupation is difficult in Edelstein s view because ambitious goals require considerable time and resources yet both the occupied population and the occupying power want occupation to end quickly and inexpensively in drawn out occupations impatience grows and resources dwindle This combination sabotages the occupying power s ability to

accomplish two tasks convince an occupied population to suppress its nationalist desires and sustain its own commitment to the occupation Structural conditions and strategic choices play crucial roles in the success or failure of an occupation In describing those factors Edelstein prescribes a course of action for the future

An Empire of Indifference Randy Martin,2007-03-14 Analyzes imperial ambitions in the context of the dominance of finance not simply as a form of capital but also as a set of protocols for organizing daily life

Rebuilding War-Torn States Graciana del Castillo,2008-09-25 Post conflict economic reconstruction is a critical part of the political economy of peacetime and one of the most important challenges in any peace building or state building strategy After wars end countries must negotiate a multi pronged transition to peace Violence must give way to public security lawlessness political exclusion and violation of human rights must give way to the rule of law and participatory government ethnic religious ideological or class caste confrontation must give way to national reconciliation and ravaged and mismanaged war economies must be reconstructed and transformed into functioning market economies that enable people to earn a decent living Yet how can these vitally important tasks each be successfully managed How should we go about rehabilitating basic services and physical and human infrastructure Which policies and institutions are necessary to reactivate the economy in the short run and ensure sustainable development in the long run What steps should countries take to bring about national reconciliation and the consolidation of peace In all of these cases unless the political objectives of peacetime prevail at all times peace will be ephemeral while policies that pursue purely economic objectives can have tragic consequences This book argues that any strategy for post conflict economic reconstruction must be based on five premises and examines specific post conflict reconstruction experiences to identify not only where these premises have been disregarded but also where policies have worked and the specific conditions that have influenced their success and failure

Conflict and Development Roger Mac Ginty,Andrew Williams,2009-03-24 Over the past decade a new awareness of the relationship between conflicts and development has grown Developmental factors can act as a trigger for violence as well as for ending violence and for triggering post conflict reconstruction This book explores the complexity of the links between violent conflict usually civil wars and development under development and uneven development It emphasizes the connections between stable developed economies and civil wars in other parts of the world and examines how structural factors such as the organization of the global economy virtually condemn some regions to conflict and under development This valuable introductory text explains reviews and critically evaluates this complex relationship It focuses on intra state conflicts and complex political emergencies that combine transnational and internal characteristics Attention is also given to inter state conflicts Chapters emphasize how the relationship between conflict and development traverses many scales macro meso and micro and dimensions economic political and cultural Furthermore it explains how different developmental challenges and opportunities emerge along the full life cycle of conflict Specifically the role of poverty state market civil society globalization humanitarian aid refugees gender and health within conflict dynamics

are examined The book also investigates specific developmental issues emerging during conflict management and post conflict reconstruction Both authors have a background in conducting research in deeply divided societies and argue that many of the processes connected with war and peace making deliberately write people out of the equation This book attempts to write people in By drawing on contemporary theoretical debates and examining current policies and events the text unpacks the difficult and complex aspects of the relationships between armed conflict and development and makes them accessible interesting and policy relevant It considers how peace making peace building and post war reconstruction are usually more sustainable and successful if politicians policy makers entrepreneurs and those working for international NGOs take on board local opinion and capacity Written in an accessible style the book considers the main contemporary theories and arguments on conflict development and the interactions between the two The text is illuminated throughout with case studies drawn from Africa the Balkans Asia and the Middle East *Historical Dictionary of Afghanistan* Ludwig W.

Adamec,2012 This new fourth edition has been substantially expanded because so much has taken place in such a short period of time The most important changes however have been made to the dictionary section with hundreds of added or substantially revised entries on important people places events institutions practices ethnic and religious groups political parties and Islamist movements as well as significant aspects of Afghanistan s politics economy society and culture

Afghanistan Barnett R. Rubin,2020 Afghanistan a landlocked country in Central Asia has improbably been at the center of international geopolitics for four decades After the Soviet Union invaded in 1980 Afghanistan descended into an unending conflict that featured at various points most of the world s major powers In the mid 1990s the country entered a new phase when the Taliban took power and imposed order based on a harsh repressive version of Islamic law Infamously the sheltered Osama bin Laden whose attack on 9 11 Towers ushered in the Global War on Terror drew tens of thousands of American troops to the country where they remain today In *Afghanistan What Everyone Needs to Know* R leading scholar Barnett R Rubin provides an overview of this complicated nation After providing a concise history of Afghanistan he explores the various peoples and cultures of the country and its relations with neighbors like Pakistan and Iran He also provides an authoritative overview of the conflicts that have plagued the country since the Soviet invasion Both wide ranging and pithy this book explains why Afghanistan matters and what its possible future might look like **A Brief History of Afghanistan**
