consists or it may be judged with regard to its general utility in the scheme of literature to which it belongs In an age which is sometimes ironically called remarkable for its commercialism nothing has been more truly remarkable than the advancement in learning as well as in material progress and of all the instruments that have contributed to this end none has been more effective perhaps than the practical popularisation of literature In THE WORLD S GREATEST BOOKS an attempt has been made to effect a compendium of the world s best literature in a form that shall be at once accessible to every one and still faithful to its originals or in other words it has been sought to allow the original author to tell his own story over again in his own language but in the shortest possible space However we are aware that even THE WORLD S GREATEST BOOKS will not escape the criticism of a small class of people who will profess to object to this as to any kind of interference with an author s original in reply to which it can only be said that such objections are seldom if ever made in the true interests of learning or in a genuine spirit of inquiry and too often only proceed from a knowledge of books or love of them which goes no deeper than their title page The selections in THE WORLD S GREATEST BOOKS have been collected and are alphabetically arranged in ten different divisions namely Fiction Lives and Letters History Religion Philosophy Economics Science Poetry and Drama Travel and Adventure and Miscellaneous Literature An important additional feature of the work is the brief yet highly critical biographical and bibliographical note which accompanies every author and every selection throughout the twenty volumes To this must be also added the not less important Introductions and other explanations written by experts which often accompany the selections in the text cardinal examples of which will be found in particular in the section of Religion of this work in the articles dealing with such subjects as the Book of the Dead Brahmanism Confucianism the Koran Talmud etc

Charles Dickens and the Form of the Novel Graham Daldry, 2016-08-05 First published in 1987 While there have been commentaries on his humour his seriousness his social concerns and other specific aspects of his work such accounts have only tended to divide our understanding of the novels to lead us to see them as failures of artistic unity In this book the author seeks to address this question of unity and find a terminology that can treat language plot and representation of reality as a coherent imaginative effort This thesis is worked out in detail with reference to several of the novels and represents a challenging re evaluation Dickens achievement as a novelist This book will be of interest to student of literature
