River Conservation and Water Resource Management Praveen Kumar Rai,2023-10-11 This book presents an up to date systematic and scientific analysis of water resource problems in India and suggests measures to overcome them through effective water management In addition the book provides an overview of how changes in legislation policies institutional responsibilities science technology practical techniques and public perception have influenced the ways of river management over the past years River water conservation is a planned activity connected with various habitat features and outlines how to conserve all river water spread across the world The restoration and conservation of river water must be of the highest priority for sustaining humanity and ecology for the present and future generations In order to solve the water problems conservation and recycling of water should be made mandatory for all domestic industrial and agricultural projects Apart from the priority to watershed development rainwater harvesting and other appropriate conservation measures should be adopted to create awareness among the public so that their mind set attitudes and habits change proactively and they adopt sustainable practices rather than wait for legislation and regulations The book augments the knowledge base of behaviour of rivers and evaluates the issues related to rivers so as to develop river system management techniques emerging from in depth scientific analyses It is useful for students researchers water resource managers hydrologists and all those who are engaged or interested in any aspect of river water conservation and management of water resources in the country

Global Perspectives on River Conservation P. J. Boon,B. R. Davies,Geoffrey E. Petts,2000-10-03 Throughout the world river conservation is becoming an increasingly important concern In arid regions for instance rivers often form the only water resource for human sustenance indeed the World Bank has predicted that future wars will be about water In many parts of the developing world rivers are used as repositories for waste and river ecosystems consequently reflect the worst excesses of human exploitation In the industrialised nations the focus of attention is beginning to move from chemical clean up to restoring the structural damage to rivers caused by decades of river engineering Recognition is growing that river management needs a catchment wide perspective if the needs of human populations river habitats and wildlife are to reach a sustainable balance The development of river conservation strategies has become a global imperative Global Perspectives on River Conservation is the first book that provides a truly global synthesis of knowledge on river conservation with the aim of encouraging strategic river planning It does this in two ways First it sets out a worldwide region by region overview of the science policy and practice of river

conservation Second it provides a topical review of different river settings such as tropical temperate temporary perennial large small and contemporary issues in river conservation such as classification and evaluation environmental legislation the role of public participation Global Perspectives on River Conservation is an invaluable reference for river managers planners and developers conservationists statutory water agencies government departments academics researchers postgraduates and final year under graduates working in the field of environmental management of inland waters *River Conservation, Development and Its Management* ,2020 **Water Resources, Conservation and Management** S.N. Chatterjee,2008 In Indian context **River Conservation Development and Its Management** Indra Prasad Tripathi,2021 Storm Water Management Guidelines - Grand River Conservation Authority Grand River Conservation Authority,1982 **River Channel Management** Peter Downs,Ken Gregory,2014-02-24 River Channel Management is the first book to deal comprehensively with recent revolutions in river channel management It explores the multi disciplinary nature of river channel management in relation to modern management techniques that bear the background of the entire drainage basin in mind use channel restoration where appropriate and are designed to be sustainable River Channel Management is divided into five sections The Introduction outlines the need for river channel management Retrospective Review offers an overview of twentieth century engineering methods and the ways that river channel systems operate Realisation explains how greater understanding of river channel adjustments channel hazards and river basin planning created a context for twenty first century management Requirements for Management explains and examines environmental assessment restoration based approaches and methods that work towards design with nature Final Revision speculates about prospects for twenty first century river channel management River Channel Management is written for higher level undergraduates and for postgraduates in geography ecology engineering planning geology and environmental science for professionals involved in river channel management and for staff in environmental agencies Integrated Water Management in Canada Dan Shrubsole,Dan Walters,Barbara Veale,Bruce Mitchell,2018-12-07 This volume provides readers with an opportunity to learn from front line water managers of watershed based agencies across Canada about integrated water management or integrated water resource management In common with practice in much of the world the responsibility for implementing integrated watershed management in Canada is fragmented Each province and territory in Canada has developed unique approaches or governance models to guide decision making in that regard Thus this edited volume enables readers from around the world to gain insight on the best practices in Canada for achieving success and addressing barriers to implement IWM Although there remains non consensus about how to best approach river basin management some of the main observations include There is a need to balance a focus on the big picture with scoping the scale and scope of planning activities in order that feasible and effective solutions can be implemented Three types of integration are popular among the agencies included in the book i among environment economy and society ii interactions between people and the environment

and iii integration or coordination of administrative activities Much more attention is required to achieving effective engagement from Indigenous communities The chapters were originally published in a special issue of the International Journal of Water Resources Development

River restoration: a strategic approach to planning and management Speed, Robert, Tickner, David, Naiman, Robert, Lei Gang, Sayers, Paul, Wei Yu, Li Yuanyuan, Huang Houjian, Cao Jianting, Yu Lili, Zhao Zhongnan, 2016-09-19

Proceedings of the Symposium on Restoration Planning for the Rivers of the Mississippi River Ecosystem, 1993 This symposium was organized to review the status of fish and wildlife resources of the Mississippi River ecosystem The objectives were as follows 1 to present some of the existing information on native and introduced fish methods for surveying the aquatic communities human impacts effects of changes in the geomorphology and hydrology on the biota and values associated with riverine resource throughout the basin 2 to identify existing or planned actions that might be useful for fisheries management in rivers within the basin and 3 to identify minimal requirements for the restoration of important finfish and shellfish stocks other aquatic resources and entire ecosystems

Revitalizing Urban Waterway Communities Richard Smardon, Sharon Moran, April Karen Baptiste, 2018-06-14 The revitalizing and restoration of rivers creeks and streams is a major focus of urban conservation activity throughout North America and Europe This book presents models and examples for organizing multiple stakeholders for purposes of waterway revitalization if not restoration within a context of fairness and environmental justice After decades of neglect and misuse the challenge of cleaning up urban rivers and streams is shown to be complex and truly daunting Urban river cleanup typically involves multiple agendas and stakeholders as well as complicated technical issues It is also often the situation that the most affected have the least voice in what happens The authors present social process models for maximum inclusion of various stakeholders in decision making for urban waterway regeneration A range of examples is presented drawn principally from North America and Europe

River Restoration Stephen Darby, David Sear, 2008-02-28 River restoration projects are designed to recreate functional characteristics within a context of physical stability They tend to focus on the development and application of geomorphic principles for river restoration design Due to different models obtaining different results on the same problem incomplete or absent data and climatic social cultural changes the designers and managers of such projects frequently face high levels of uncertainty This book will provide a systematic overview of the issues involved in minimizing and coping with uncertainty in river restoration projects A series of thematic sections will be used to define the various sources of uncertainty in restoration projects and how these show at different points in the life cycle design construction and post construction phases of restoration projects The structure of the book will offer a rational theoretical analysis of the problem while providing practical guidance in managing the different sources of uncertainty A wide range of case studies will be included from Europe North America and Australasia
