Moonshiners and Prohibitionists Bruce E. Stewart, 2011-04-22 A masterly study of how the business of homemade liquor shaped the history and culture of a region Journal of American History Homemade liquor has played a prominent role in the Appalachian economy for nearly two centuries The region endured profound transformations during the extreme prohibition movements of the nineteenth century when the manufacturing and sale of alcohol an integral part of daily life for many Appalachians was banned Moonshiners and Prohibitionists The Battle over Alcohol in Southern Appalachia chronicles the social tensions that accompanied the region s early transition from a rural to an urban industrial economy It analyzes the dynamic relationship of the bootleggers and opponents of liquor sales in western North Carolina as well as conflict driven by social and economic development that

manifested in political discord and also explores the life of the moonshiner and the many myths that developed around hillbilly stereotypes A much needed contribution to our understanding of the complex social economic religious and cultural issues underlying the prohibition impulse that swept the South between 1880 and 1920 *Journal of Southern History*

Creating the Land of the Sky Richard D. Starnes, 2010-03-12 A sophisticated inquiry into tourism's social and economic power across the South In the early 19th century planter families from South Carolina Georgia and eastern North Carolina left their low country estates during the summer to relocate their households to vacation homes in the mountains of western North Carolina Those unable to afford the expense of a second home relaxed at the hotels that emerged to meet their needs This early tourist activity set the stage for tourism to become the region's New South industry After 1865 the development of railroads and the burgeoning consumer culture led to the expansion of tourism across the whole region Richard Starnes argues that western North Carolina benefited from the romanticized image of Appalachia in the post Civil War American consciousness This image transformed the southern highlands into an exotic travel destination a place where both climate and culture offered visitors a myriad of diversions This depiction was further bolstered by partnerships between state and federal agencies local boosters and outside developers to create the attractions necessary to lure tourists to the region As tourism grew so did the tension between leaders in the industry and local residents The commodification of regional culture low wage tourism jobs inflated land prices and negative personal experiences bred no small degree of animosity among mountain residents toward visitors Starnes's study provides a better understanding of the significant role that tourism played in shaping communities across the South

Space, Place and Religious Landscapes Darrelyn Gunzburg, Bernadette Brady, 2020-10-01 Exploring sacred mountains around the world this book examines whether bonding and reverence to a mountain is intrinsic to the mountain constructed by people or a mutual encounter Chapters explore mountains in England Scotland Wales Italy Ireland the Himalaya Japan Greece USA Asia and South America and embrace the union of sky landscape and people to examine the religious dynamics between human and non human entities This book takes as its starting point the fact that mountains physically mediate between land and sky and act as metaphors for bridges from one realm to another recognising that mountains are relational and that landscapes form personal and group cosmologies The book fuses ideas of space place and material religion with cultural environmentalism and takes an interconnected approach to material religious landscapes In this way it fills the gap between lived religious traditions personal reflection phenomenology historical context environmental philosophy myths and performativity In defining material religion as active engagement with mountain forming and humanshaping landscapes the research and ideas presented here provide theories that are widely applicable to other forms of material religion
