Ausstellung u.d.T.: Exposition Robert Morris Robert Morris, 2000 The Robert Morris retrospective at the Centre Georges Pompidou in 1995 was not able to show Everything of the mobile deliberately contradictory work in constant mutation of this American artist It is true that at the end of the 1990s the French public was already far from totally ignorant of Morris's career but the theoretician of Minimal Art and inventor of the Antiform still masked the existence of the inveterate experimenter The Musée d'Art Contemporain has decided to do something about this incomplete perception of Robert Morris's work by handing over to him an entire floor of the museum each summer for three years running 1998 1999 2000 This has allowed him to do what to his eyes is more important still than the coherence of his past work namely to Continue to work

Ausstellung u.d.T.: Exposition Robert Morris Robert Morris, 2000 **Transfixed by Prehistory** Maria Stavrinaki, 2022-05-24 An examination of how modern art was impacted by the concept of prehistory and the prehistoric Prehistory is an invention of the late nineteenth century In that moment of technological progress and acceleration of production and circulation three major Western narratives about time took shape One after another these new fields of inquiry delved into the obscure immensity of the past first to surmise the age of the Earth second to find the point of emergence of human beings and third to ponder the age of art Maria Stavrinaki considers the inseparability of these accounts of temporality from the disruptive forces of modernity She asks what a history of modernity and its art would look like if considered through these three interwoven inventions of the longue durée Transfixed by Prehistory attempts to articulate such a history which turns out to be more complex than an inevitable march of progress leading up to the Anthropocene Rather it is a history of stupor defamiliarization regressive acceleration and incessant invention since the new was also found in the deep sediments of the Earth Composed of as much speed as slowness as much change as deep time as much confidence as skepticism and doubt modernity is a complex phenomenon that needs to be rethought Stavrinaki focuses on this intrinsic tension through major artistic practices Cézanne Matisse De Chirico Ernst Picasso Dubuffet Smithson Morris and contemporary artists such as Pierre Huyghe and Thomas Hirschhorn philosophical discourses Bataille Blumenberg and Jünger and the human sciences This groundbreaking book will attract readers interested in the intersections of art history anthropology psychoanalysis mythology geology and archaeology *Robert Morris* Katia Schneller, 2008 Depuis le début des années 1960 l'Américain Robert Morris n'en 1931 a développé une œuvre qui se caractérise avant tout par sa diversité Art minimal art conceptuel land art ou encore performance sculpture peinture dessin critique l'artiste n'a cessé d'explorer de nouveaux territoires au risque d'être parfois perçu comme eclectique Ce livre choisit de s'attacher la notion de mémoire si constamment présente dans l'œuvre mémoire physiologique expérimentale d'un côté mémoire affective mélancolique autobiographique de l'autre pour ordonner cette complexité **From Mnemosyne to Clio** Robert Morris, Musée Saint-Pierre art contemporain (Lyon, France), 2000 The Robert Morris retrospective at the Centre Georges Pompidou in 1995 was not able to show everything of
