Roots Theminkosi Lehloesa,2011-08-22 In Africa no European country has had an influence as Britain The first tangible break in the development was achieved by the South African parliament in 1934 But already Britain had shaped and predetermined South Africa s future The country wanted no other than evolutionary change and this theme informed all administrations Deception was the name of the game as was the violation of resolutions of the United Nations Thus by the 1990s Britain was relative to other European countries in a far better position to influence the

policies of an African National Congress run government Sociétés Transnationales Centre on Transnational Corporations (United Nations),1988 **Elites, Crises, and the Origins of Regimes** Mattei Dogan,John Higley,1998 Most political regimes whether authoritarian or democratic are born in abrupt brutal and momentous crises In this volume a group of prominent scholars explores how these seminal events affect elites and shape regimes Combining theoretical and case study chapters the authors draw from a wide range of historical and contemporary examples to challenge mainstream developmental explanations of political change which emphasize incremental changes and evolutions stretching over generations **Zimbabwe's Migrants and South Africa's Border Farms** Maxim Bolt,2015-09-25 During the Zimbabwean crisis millions crossed through the apartheid era border fence searching for ways to make ends meet Maxim Bolt explores the lives of Zimbabwean migrant labourers of settled black farm workers and their dependants and of white farmers and managers as they intersect on the border between Zimbabwe and South Africa Focusing on one farm this book investigates the role of a hub of wage labour in a place of crisis A close ethnographic study it addresses the complex shifting labour and life conditions in northern South Africa s agricultural borderlands Underlying these challenges are the Zimbabwean political and economic crisis of the 2000s and the intensified pressures on commercial agriculture in South Africa following market liberalization and post apartheid land reform But amidst uncertainty farmers and farm workers strive for stability The farms on South Africa s margins are centers of gravity islands of residential labour in a sea of informal arrangements **The International Journal of African Historical Studies** ,1986 The Roots of Political Instability in Nigeria E.C. Ejiogu,2016-02-24 The constant drumbeat of headlines about Darfur Zimbabwe Sudan Somalia as well as the other states in Africa that are beleaguered by political instability have made the causes of failed states and intra state political conflicts a major issue both academic and practical Using Harry Eckstein and Ted R Gurr s congruence consonance theoretical framework of regime classification E C Ejiogu examines the internal variations of society evident in the Nigerian state to explain why the country experiences political conflict and instability The first time this theoretical framework has been applied to an African country E C Ejiogu offers a balanced and interdisciplinary analysis of the evolution in the Nigerian political system and the role played by evolved social traits in society Exploring themes such as colonial rule and legacies economic development political authority and religion Ejiogu insists that it is critical to examine Africa s diverse nationalities in terms of their geography social economic and authority patterns as critical elements that are disregarded in accounts of their political development At a time when the question of state building in Africa is still unresolved this timely book is a major contribution to the literature on transition processes in African politics and is particularly relevant to scholars and policy makers wanting to grapple with the issues associated with Africa s political disorder and the other social problems it spawns **Asian Imperial Banking History** Hubert Bonin,2015-10-06 When European powers annexed parts of Asia banking systems were an important part of that process The essays in this edited collection are based on original research

using primary sources in English French Russian Chinese and Japanese The book as a whole provides new insights into banking in imperial Asia and a platform for further research **A Far-Away War** Ian Liebenberg, Jorge Risquet, Vladimir Shubin, 2016-01-31 South Africa's armed forces invaded Angola in 1975 setting off a war that had consequences for the whole region that are still felt today A Far Away War contributes to a wider understanding of this war in Angola and Namibia The book does not only look at the war from an old South African Defence Force perspective but also gives a voice to participants on the other side emphasising the role of the Cubans and Russians This focus is supplemented by the inclusion of many never before published photographs from Cuban and Russian archives and a comprehensive bibliography *The Cambridge History of the British Empire* Eric Anderson Walker, 1963 Land Rights, Ethno-nationality and Sovereignty in History Stanley Engerman, Jacob Metzger, 2004-08-02 The complex relationships between ethno nationality rights to land and territorial sovereignty have long fed disputes over territorial control and landed rights between different nations ethnicities and religions These disputes raise a number of interesting issues related to the nature of land regimes and to their economic and political implications The studies drawn together in this key volume explore these and related issues for a broad variety of countries and times They illuminate the diverse causes of ethno national land disputes and the different forms of adjustment and accommodation to the power differences between the contesting groups This is done within a framework outlined by the editors in their analytical overview which offers contours for comparative examinations of such disputes past and present Providing conceptual and factual analyses of comparative nature and wealth of empirical material both historical and contemporary this book will appeal to economic historians economists political scientists sociologists anthropologists and all scholars interested in issues concerning ethno nationality and land rights in historical perspective **The Urban Roots of Democracy and Political Violence in Zimbabwe** Timothy Scarnecchia, 2008 The author further proposes that this recourse to political violence top down nationalism and the abandonment of urban democratic traditions are all hallmarks of a particular type of nationalism equally unsustainable in Zimbabwe then as it is now **BOOK JACKET** **The People's Paper** Peter Limb, 2012-09-01 This much awaited volume uncovers the long lost pages of the major African multilingual newspaper Abantu Batho Founded in 1912 by African National Congress ANC convenor Pixley Seme with assistance from the Swazi Queen it was published up until 1931 attracting the cream of African politicians journalists and poets Mqhayi Nontsisi Mqgqweth and Grendon In its pages burning issues of the day were articulated alongside cultural by ways The People's Paper comprising both essays and an anthology explores the complex movements and individuals that emerged in the almost twenty years of its publication The essays contribute rich new material to provide clearer insights into South African politics and intellectual life The anthology unveils a judicious selection of never before published columns from the paper spanning every year of its life and drawn from repositories on three continents Abantu Batho had a regional and international focus and by examining all these dynamics across boundaries and disciplines The People's Paper transcends established historiographical

frontiers to fill a lacuna that scholars have long lamented **Plagues in World History** John Aberth, 2011-01-16 Plagues in World History provides a concise comparative world history of catastrophic infectious diseases including plague smallpox tuberculosis cholera influenza and AIDS Geographically these diseases have spread across the entire globe temporally they stretch from the sixth century to the present John Aberth considers not only the varied impact that disease has had upon human history but also the many ways in which people have been able to influence diseases simply through their cultural attitudes toward them The author argues that the ability of humans to alter disease even without the modern wonders of antibiotic drugs and other medical treatments is an even more crucial lesson to learn now that AIDS swine flu multidrug resistant tuberculosis and other seemingly incurable illnesses have raged worldwide Aberth's comparative analysis of how different societies have responded in the past to disease illuminates what cultural approaches have been and may continue to be most effective in combating the plagues of today
