Sea Power Guide For The 21st Century:

Seapower Geoffrey Till, 2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till's study is an exploration of how change will impact upon the world's navies **Twenty-First Century Seapower** Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general **Seapower** Geoffrey Till, 2013 This revised updated and expanded edition of Geoffrey Till's acclaimed textbook provides an invaluable guide for anyone interested in the changing and crucial role of seapower in the 21st century **Empire, Technology and Seapower** Howard J. Fuller, 2014-01-03 This book examines British naval diplomacy from the end of the Crimean War to the American Civil War showing how the mid Victorian Royal Navy suffered serious challenges during the period Many recent works have attempted to depict the mid Victorian Royal Navy as all powerful innovative and even self assured In contrast this work argues that it suffered serious challenges in the form of expanding imperial commitments national security concerns precarious diplomatic relations with European Powers and the United States and technological advancements associated with the armoured warship at the height of the so called Pax Britannica Utilising a wealth of international archival sources this volume explores the introduction of the monitor form of ironclad during the American Civil War which deliberately forfeited long range power projection for local coastal command of the sea It looks at the ways in which the Royal Navy responded to this new technology and uses a wealth of international primary and secondary sources to ascertain how decision making at Whitehall affected that at Westminster The result is a better balanced understanding of Palmerstonian diplomacy from the end of the Crimean War to the American Civil War the early evolution of the modern capital ship including the catastrophic loss of the experimental sail and turret ironclad H M S Captain naval power projection and the nature of empire technology and seapower This book will be of great interest to all students of the Royal Navy and of maritime and strategic studies in general *21st Century Mahan* Benjamin F. Armstrong, 2013-08-14 Alfred Thayer Mahan's *The Influence of Seapower upon History* is well known to students of naval history and strategy but his other writings are often dismissed as irrelevant to today's problems This collection of five of

Mahan's essays along with Benjamin Armstrong's informative introductions illustrates why Mahan's work remains relevant to the 21st century and how it can help develop our strategic thinking. People misunderstand Mahan, the editor argues, because they have read only what others say about him, not what Mahan wrote himself. Armstrong's analysis is derived directly from Mahan's own writings. From the challenges of bureaucratic organization and the pitfalls of staff duty to the development of global strategy and fleet composition to illustrations of effective combat leadership, Armstrong demonstrates that Mahan's ideas continue to provide today's readers with a solid foundation to address the challenges of a rapidly globalizing world.

Seapower in the Post-modern World Basil Germond, 2024-04-16 In an era of increasing geopolitical tensions, disruptive technologies, and the rise of authoritarianism, the question of who masters the seas is more than ever central to the future of the international order. But while naval operations, maritime security, and ocean governance have become increasingly relevant in world politics, the concept and definition of seapower have largely been neglected by the scholarship in the international relations field. *Seapower in the Post-modern World* fills this gap with an analysis of the naval, economic, and ideational dimensions of seapower from antiquity to today. Exploring the extent to which the permanent elements associated with seapower, such as technology, commerce, and maritime culture, transcend historical periods, Basil Germond frames contemporary seapower as a combination of components including traditional naval power, post-modern conceptions of collective and civilian seapower, and the neo-modern phenomena of maritime territorialization and the naval arms race. By giving seapower a new conceptual definition, *Seapower in the Post-modern World* offers key analytical tools for understanding the stability of the global maritime order and seapower's contribution to global leadership more broadly.

Navies in the 21st Century Conrad Waters, 2016-09-30 A range of naval experts build a diverse and deeply thought-out picture of where maritime warfare is now and where it is likely to go. *Army Rumour Service*: What is the purpose of navies in the modern world and what types of warship does this require? This book tackles these questions by looking at naval developments, both technological and operational, in the quarter century since the end of the Cold War. It provides the overall political and economic context, assesses significant naval operations from the first Gulf War to Russia's annexation of Crimea, reviews changes in the objectives and composition of the principal fleets, describes major design developments amongst the main warship types, and examines wider technological and operational developments including naval aviation, shipbuilding, and manning. A high-quality publication with a great many superb photographs. For those wishing to keep fully informed on world naval affairs, it is excellent value and strongly recommended. *Scuttlebutt*: This new book follows the successful approach and format of the very popular naval annual *Seaforth's World Naval Review*. Under the same editor, a new team of specialists have been assembled to write authoritative articles in their particular fields of expertise. The absorbing text is fully supported by many outstanding images. *Most Recommended*: *Firetrench* Provides a most useful contextual analysis of the post-Cold War period, explaining how technological developments and a range of world events have variously shaped the fleets of today.

Warship **Sea Power and the Asia-Pacific** Geoffrey Till, Patrick Bratton, 2012-02-07 With particular focus on the Asia Pacific region this book examines the rise and fall of sea powers In the Asia Pacific region there has been significant expansion of sea based economies together with burgeoning naval power Many claim that these processes will transform the world's future economic and security relationships The book addresses the question of to what extent the notion of Asia rising is reflected by and dependent on its developing sea power A central theme is the Chinese challenge to long term Western maritime ascendancy and what might be the consequences of this In order to situate current and future developments this book includes chapters which analyse what sea power means and has meant as well as its role both historic and contemporary in the rise and fall of great powers This book will be of much interest to students of naval power Asian politics strategic studies war and conflict studies IR and security studies

Indian Naval Strategy in the Twenty-first Century James R. Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions By a quirk of historical fate Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea ushering in centuries of Western dominance In the 21st century however Asian states are once again resuming a naval focus with both China and India dedicating some of their new found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces The United States like the British Empire before it is attempting to manage these rising sea powers while preserving its maritime primacy This book probes how India looks at the sea what kind of strategy and seagoing forces New Delhi may craft in the coming years and how Indian leaders may use these forces It examines the material dimension but its major premise is that navies represent a physical expression

of a society's history philosophical traditions and culture This book then ventures a comprehensive appraisal of Indian maritime strategy This book will be of interest to students of sea power strategic studies Indian politics and Asian Studies in general James R Holmes is an Associate Professor of Strategy at the U S Naval War College and a former U S Navy surface warfare officer Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College Andrew C Winner is Professor in the Strategic Research Department at the U S Naval War College

Chinese Naval Strategy in the 21st Century James R. Holmes, Toshi Yoshihara, 2012-09-10 Alfred Thayer Mahan has been called America's nineteenth century evangelist of sea power and the intellectual father of the modern US Navy His theories have a timeless appeal and Chinese analysts now routinely invoke Mahan's writings exhorting their nation to build a powerful navy Economics is the prime motivation for maritime reorientation and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis vis the nautical arena It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas Empirical analysis adds a new dimension to the current debate over China's rise and its importance for international relations The findings also clarify the possible implications of China's maritime rise for the United States and illuminate how the two powers can manage their bilateral interactions on the high seas

Chinese Naval Strategy in the 21st Century will be of much interest to students of naval history Chinese politics and security studies

Military Strategy in the 21st Century Kersti Larsdotter, 2020-05-21 Military Strategy in the 21st Century explores military strategy and the new challenges facing Western democracies in the twenty first century including strategy in cyber operations and peacekeeping challenges for civil military relations and the strategic choices of great powers and small states The volume contributes to a better understanding of military strategy in the twenty first century through exploring strategy from three perspectives first the study of strategy and how our understanding of strategy has changed over time second new areas for strategic theory such as peacekeeping and cyberspace and third the makers of strategy and why states choose suboptimal strategies With the increasing number of threats challenging strategy makers such as great power rivalry terrorism intrastate wars and transnational criminal organisations Military Strategy in the 21st Century will be of great value to scholars of IR Security Studies Strategic Studies and War Studies as well as policymakers and practitioners working with military strategy in particular and international security and war in general The chapters were originally published as a special issue of the Journal of Strategic Studies

Europe, Small Navies and Maritime Security Robert McCabe, Deborah Sanders, Ian Speller, 2019-09-16 This book seeks to identify and address gaps in our understanding of maritime security and the role of small navies in Europe The majority of Europe's navies are small yet they are often called upon to address a complex array of traditional and non traditional threats This volume examines the role of small navies

within the European security architecture by discussing areas of commonality and difference between navies and arguing that it is not possible to fully understand either maritime strategy or European security without taking into account the actions of small navies. It contains a number of case studies that provide an opportunity to explore how different European states view the current security environment and how naval policy has undergone significant changes within the lifetime of the existing naval assets. In addition, the book examines how maritime security and naval development in Europe might evolve given that economic forecasts will likely limit the potential procurement of larger naval assets in the future, which means that European states will increasingly have to do more with less in the maritime domain. This book will be of much interest to students of maritime strategy, naval power, strategic studies, European politics, and international relations in general. **2007**
