[Ancient Ocean Crossings](#) Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography

ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

8 Men and a Duck Nick Thorpe,2007-11-01 8 Men and a Duck charts the hilarious and unnerving Pacific voyage as it rolls between waves of high drama and high farce from the five day launch off a Chilean beach to the bungled phone call that triggered a naval rescue alert to the sad fate of Pedro the duck to the constant race against the inexorable sinking of the soggy hull On a fateful South American bus trip journalist Nick Thorpe overheard some fellow passengers discussing an improbable plan to sail 2 500 miles from northern Chile to Easter Island on the Viracocha a boat made of reeds The crew s aim in reviving this pre Incan boat building technology was twofold to reopen the controversial migration theories of Thor Heyerdahl who sailed his boat the Kon Tiki from Peru to Polynesia in 1947 and to have one heck of an adventure in the process Thorpe talked his way on board Captain Phil Buck s Viracocha only to find himself plagued by uncertainty Why did the crew include a tree surgeon a jewelry salesman and two ducks What happened to the navigator Did anybody actually know how to sail And most important where was the life raft Despite the best efforts of storms and sharks and fast moving freighters an alarming lack of sailing qualifications and a rival explorer dogging the adventure at every turn the crew members of the Viracocha lived to tell their extraordinary tale right through to its wickedly unexpected conclusion Nick Thorpe s account is by turns funny touching and thrilling a story of friendship fate and the unlikely distances people will go for real adventure

Nautilus: a modern sequel to 20,000 Leagues Under the Sea P.J. Capelotti,2009-03-29 In the summer of 2021 Norwegian explorer Bjorn Larsen and Italian archaeologist Paolo Serengetti are completing a wide ranging archaeological survey along the north coast of the Norwegian Arctic archipelago of Svalbard on board the research vessel Polar Quest The objective of their expedition is to locate any surviving evidence of the disastrous 1928 Italia dirigible expedition to the North Pole But instead of finding the lost airship in a remote fjord of the archipelago they stumble instead upon a previously unknown shipwreck As the identity of their discovery becomes apparent so too does its magnitude a submarine that appears to be the same Nautilus described by Jules Verne in the novel 20 000 Leagues Under the Sea It soon becomes evident to Serengetti and Larsen that Verne s famous novel was not a dramatic imaginative science fiction story but a fictionalized account of an undersea voyage that actually took place in 1867
