Sea Power In The Twenty First Century Projecting A Naval Revolution:

Sea Power in the Twenty-First Century Charles Koburger, 1997-09-16 As the U S Navy enters the twenty first century many of the ships aircraft weapons and tactics it employed so successfully during the Cold War will no longer be cost effective or even effective Future battlefields will shift the locus of naval action from the high seas into littoral waters demanding sustained operations in relatively narrow shallow waters Naval forces in the twenty first century must not only meet the traditional requirements of command of the sea ships planes troops and bases carrying out forward presence crisis response strategic deterrence and sealift They must now put these together to obtain the four key operational capabilities of littoral warfare command control intelligence and surveillance and communication battlespace dominance power projection and force sustainment The core of the new U S strategic concept is power projection and it envisions naval forces directly leading Army and Air Force elements to influence events ashore most probably in the Third World And this navy must be cost effective Military Review, 1999 America, Sea Power, and the World James C. Holmes, Toshi

Yoshihara,2012-09-10 Alfred Thayer Mahan has been called America's nineteenth century evangelist of sea power and the intellectual father of the modern US Navy His theories have a timeless appeal and Chinese analysts now routinely invoke Mahan's writings exhorting their nation to build a powerful navy Economics is the prime motivation for maritime reorientation and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis vis the nautical arena It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas Empirical analysis adds a new dimension to the current debate over China's rise and its importance for international relations The findings also clarify the possible implications of China's maritime rise for the United States and illuminate how the two powers can manage their bilateral interactions on the high seas Chinese Naval Strategy in the 21st Century will be of much interest to students of naval history Chinese politics and security studies **Parameters** ,1998

Why Taiwan? Geostrategic Rationales for China's Territorial Integrity Alan M. Wachman,2008 Why has the PRC been so determined that Taiwan be part of China Why since the 1990s has Beijing been feverishly developing means to prevail in combat with the U S over Taiwan's status Why is Taiwan worth fighting for To answer this book focuses on the territorial dimension of the Taiwan issue and highlights arguments made by PRC analysts about the geostrategic significance of Taiwan rather than emphasizing the political dispute between Beijing and Taipei It considers Beijing's quest for Taiwan since 1949 against the backdrop of recurring Chinese anxieties about the island's status since the seventeenth century Seapower States Andrew Lambert,2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world The Wall Street Journal In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of *The Challenge Britain Against America in the Naval War of 1812* winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more These are timely

Managing Defense Transformation Asst Prof Adam N Stulberg, Professor Michael D Salomone, 2013-03-28 Why are some military organizations more adept than others at reinventing themselves Why do some efforts succeed rapidly while others only gather momentum over time or become sidetracked or even subverted This book explicates the conditions under which military organizations have both succeeded and failed at institutionalizing new ideas and forms of warfare Through comparative analysis of some classic cases US naval aviation during the interwar period German and British armour development during the same period and the US Army s experience with counter insurgency during the Vietnam War the authors offer a novel explanation for change rooted in managerial strategies for aligning service incentives and norms With contemporary policy makers scrambling to digest the lessons of recent wars in Kosovo Afghanistan and Iraq as well as to meet the unfolding challenges of the new revolution in military affairs RMA understanding the sources and impediments to transformation has become critical

Redefining the Modern Military Nathan K. Finney, Tyrell Mayfield, 2018-10-15 This edited collection will expand upon and refine the ideas on the role of ethics and the profession in the 21st Century The authors delve into whether Samuel Huntington and Morris Janowitz still ring true in the 21st century whether training and continuing education play a role in defining a profession and if there is a universal code of ethics required for the military as a profession *Redefining the Modern Military* is unique in how it treats the subject of ethics and the military profession as well as the types of writers it brings on board to address this topic The book puts a significant emphasis on individual agency for military professionalism as opposed to broad organizational or cultural change Such a review of these topics is necessary because the process of serious intellectual self reflection is a requirement especially in a profession that involves life and death of people and nations
