Searching For A Better Society The Peruvian Economy From 1950:

Searching for a Better Society John Sheahan, 2010-11-01 As in most of the rest of Latin America Peruvian economic strategy has gone in something of a circle from long established orientation toward an open economy with minimal state intervention to a period of state led development then back again to what looks like the starting point In the 1960s the Peruvian people had their first real chance to make a democratic choice between continuation of the country's open economy orientation or change they chose change Using this as his starting point Sheahan explains how their choice was not provoked by any economic crisis but by other major influences The majority of Peruvians he shows were seeking objectives more fundamental than economic growth They were with conflicting visions but with many good reasons searching for a better society While positive accomplishments have been important enough went wrong to lead Peru back to a more market determined economic system in 1990 Sheahan addresses the consequences of this return to the earlier economic strategy what might be done to shape the process of development in Peru in Latin America more generally toward less unfair societies *Searching for a Better Society* is different from the great majority of economic studies of developing countries in its emphasis on the basic role of social dissatisfaction with the country's traditional liberal economic system on the complexity of social goals involved in evaluation of the choice consequences of economic policies Market Reform in Society Moisés

Arce, 2009-03-02 Going beyond the usual state centric approach to the study of the politics of neoliberal reform Moisés Arce emphasizes the importance of understanding the interaction between state reformers and collective actors in society In *Market Reform in Society* he helpfully focuses our attention on how various societal groups are affected by different types of reform and how their responses in turn affect the state's subsequent pursuit of reform As a country characterized by strong state autonomy and widespread disintegration of civil society and representative institutions during the 1990s when Alberto Fujimori was president Peru serves as an excellent case for examining how collective actors can succeed in influencing the reform process Arce compares reforms in three areas taxation pension privatization and social sector programs in poverty alleviation and health decentralization Differences in the concentration or dispersion of costs and benefits he shows affected incentives for groups to form and engage in collective action for supporting opposing or modifying the reforms **State and**

Society in Conflict Paul W. Drake, Eric Hershberg, 2006-06-25 *State and Society in Conflict* analyzes one of the most volatile regions in Latin America the Andean states of Colombia Venezuela Ecuador Peru and Bolivia For the last twenty five years crises in these five Andean countries have endangered Latin America's democracies and strained their relations with the United States As these nations struggle to cope with demands from Washington on security policies emphasizing drugs and terrorism neoliberal economics and democratic politics their resulting domestic travails can be seen in poor economic growth unequal wealth distribution mounting social unrest and escalating political instability The contributors to this volume examine the histories politics and cultures of the Andean nations and argue that due to their shared history and modern

circumstances these countries are suffering a shared crisis of deteriorating relations between state and society that is best understood in regional not purely national terms The results in some cases have been semi authoritarian hybrid regimes that lurch from crisis to crisis often controlled through force though clinging to a notion of democracy The solution to these problems whether through democratic authoritarian peaceful or violent means will have profound implications for the region and its future relations with the world

Fujimori's Peru Catherine M. Conaghan, 2005-08-28 Alberto Fujimori ascended to the presidency of Peru in 1990 boldly promising to remake the country Ten years later he hastily sent his resignation from exile in Japan leaving behind a trail of lies deceit and corruption While piecing together the shards of Fujimori's presidency prosecutors uncovered a vast criminal conspiracy fueled by political ambition and personal greed The Fujimori regime managed to maintain a facade of democracy while systematically eviscerating democratic institutions and the rule of law through legal subterfuge intimidation and outright bribery The architect of this strategy was Fujimori's notorious intelligence advisor Vladimiro Montesinos With great skill Fujimori and Montesinos created the appearance of a democratic public sphere but ensured it would work only to suit their personal motives The press was allowed to operate but information exchange was under strict control The more government officials tampered with the free flow of ideas the more they inadvertently exposed the ills they were trying to cover up And that proved to be their downfall Merging penetrating analysis and a journalist's flair for narrative Catherine Conaghan reveals the thin line between democracy and dictatorship and shows how public institutions can both empower dictators and bring them down
