McTighe, 2025-10-01 In drawing or painting from live models and real landscapes more was at stake for artists in early modern Italy than achieving greater naturalism To work with the model in front of your eyes and to retain their identity in the finished work of art had an impact on concepts of artistry and authorship the authority of the image as a source of knowledge the boundaries between repetition and invention and even the relation of images to words This book focuses on artists who worked in Italy both native Italians and migrants from northern Europe The practice of depicting from life became a self-conscious departure from the norms of Italian arts In the context of court culture in Rome and Florence works by artists ranging from Caravaggio to Claude Lorrain Pieter van Laer to Jacques Callot reveal new aspects of their artistic practice and its critical implications **Transalpinum** Muzeum Narodowe w Gdańsku, 2004 **The Contingent Object of Contemporary Art** Martha Buskirk, 2005-02-18 An exploration of transformations in the nature of the art object and artistic

authorship in the last four decades In this book Martha Buskirk addresses the interesting fact that since the early 1960s almost anything can and has been called art Among other practices contemporary artists have employed mass produced elements impermanent materials and appropriated imagery have incorporated performance and video and have created works through instructions carried out by others Furthermore works of art that lack traditional signs of authenticity or permanence have been embraced by institutions long devoted to the original and the permanent Buskirk begins with questions of authorship raised by minimalists use of industrial materials and methods including competing claims of ownership and artistic authorship evident in conflicts over the right to fabricate artists works Examining recent examples of appropriation she finds precedents in pop art and the early twentieth century readymade and explores the intersection of contemporary artistic copying and the system of copyrights trademarks and brand names characteristic of other forms of commodity production She also investigates the ways that connections between work and context have transformed art and institutional conventions the impact of new materials on definitions of medium the role of the document as both primary and secondary object and the significance of conceptually oriented performance work for the intersection of photography and the human body in contemporary art Buskirk explores how artists active in the 1980s and 1990s have recombined strategies of the art of the 1960s and 1970s She also shows how the mechanisms through which art is presented shape not only readings of the work but the work itself She uses her discussion of the readymade and conceptual art to explore broader issues of authorship reproduction context and temporality

Ebert-Schifferer,National Gallery of Art (U.S.),2002 Catalogue of an exhibition held at the National Gallery of Art Washington D C Oct 13 2002 Mar 2 2003 [The Early American Daguerreotype](#) Sarah Kate Gillespie,2016-02-12 The American daguerreotype as something completely new a mechanical invention that produced an image a hybrid of fine art and science and technology The daguerreotype invented in France came to America in 1839 By 1851 this early photographic method had been improved by American daguerreotypists to such a degree that it was often referred to as the American process The daguerreotype now perhaps mostly associated with stiffly posed portraits of serious visaged nineteenth century personages was an extremely detailed photographic image produced though a complicated process involving a copper plate light

sensitive chemicals and mercury fumes It was as Sarah Kate Gillespie shows in this generously illustrated history something wholly and remarkably new a product of science and innovative technology that resulted in a visual object It was a hybrid with roots in both fine art and science and it interacted in reciprocally formative ways with fine art science and technology Gillespie maps the evolution of the daguerreotype as medium and as profession from its introduction to the ascendancy of the American process tracing its relationship to other fields and the professionalization of those fields She does so by recounting the activities of a series of American daguerreotypists including fine artists scientists and mechanical tinkerers She describes for example experiments undertaken by Samuel F B Morse as he made the transition from artist to inventor how artists made use of the daguerreotype both borrowing conventions from fine art and establishing new ones for a new medium the use of the daguerreotype in various sciences particularly astronomy and technological innovators who drew on their work in the mechanical arts By the 1860s the daguerreotype had been supplanted by newer technologies Its rise and fall represents an early instance of the ever constant stream of emerging visual technologies

*Environmental Humanities on the Brink*  
Vincent Bruyere, 2023-09-19 In this experimental work of ecocriticism Vincent Bruyere confronts the seeming pointlessness of the humanities amid spectacularly negative future projections of environmental collapse The vanitas paintings of the sixteenth and seventeenth centuries dazzlingly depict heaps of riches alongside skulls shells and hourglasses Sometimes even featuring the illusion that their canvases are peeling away vanitas images openly declare their own pointlessness in relation to the future This book takes inspiration from the vanitas tradition to fearlessly contemplate the stakes of the humanities in the Anthropocene present when the accumulated human record could well outlast the climate conditions for our survival Staging a series of unsettling encounters with early modern texts and images whose claims of relevance have long since expired Bruyere experiments with the interpretive affordances of allegory and fairytale still life and travelogues Each chapter places a vanitas motif canvas debris toxics paper ark meat and light in conversation with stories and images of the Anthropocene from the Pleistocene Park geoengineering project to toxic legacies to in vitro meat Considering questions of quiet erasure and environmental memory this book argues we ought to keep reading even by the flickering light of extinction
