Adoption in Japan Peter Hayes, Toshie Habu, 2006-08-25 The first book length study of adoption in Japan this impressive work tackles the innovative and sometimes controversial subject of the policies of adoption agencies in Japan The book places special adoption in the context of a liberal reformist agenda that has challenged traditional concepts of the family through the efforts to place children with difficult family backgrounds including mixed and minority ethnic backgrounds Drawing on empirical source material gathered since the late 1980s the authors consider the central policy issue of whether agencies should be given a free hand to create their own policies or whether they should be more tightly regulated Finally the book analyzes how different agency strategies for finding homes for hard to place children are related to different assumptions about the psychology and reasoning of prospective parents Adoption in Japan makes a significant contribution to the academic literature in the fields of Japanese studies public policy social work and sociology It will also be of interest to professionals involved in adoption agencies specialist social work and adoption panels
