Postcards from the Baja California Border Daniel D. Arreola, 2021-10-05. Postcards have a magical pull. They allow us to see the past through charming relics that allow us to travel back in time. Daniel D. Arreola's *Postcards from the Baja California Border* offers a window into the historical and geographical past of storied Mexican border communities. Once popular tourist destinations from the 1900s through the 1950s, the border communities explored in *Postcards from the Baja California Border* used to be filled with revelers, cabarets, curio shops, and more. The postcards in this book show the bright and dynamic past of California's borderlands while diving deep into the historic and geographic significance of the imagery found on the postcards. This form of place study calls attention to how we can see a past through a serial view of places by the nature of repetition and the photographing of the same place over and over again. Arreola draws our focus to townscapes or built landscapes of four border towns: Tijuana, Mexicali, Tecate, and Algodones during the first half of the twentieth century. With an emphasis on the tourist's view of these places, this book creates a vivid picture of what life was like for tourists and residents of these towns in the early and mid-twentieth century. *Postcards from the Baja California Border* is a rich and fascinating experience, one that takes you on a time travel journey through border town histories and geographies while celebrating the visual intrigue of postcards.

Late Cenozoic Drainage History of the Southwestern Great Basin and Lower Colorado River Region Marith C. Reheis, Robert Hershler, David M. Miller, 2008-01-01. Papers in this title were selected from presentations from an April 2005 workshop sponsored by the U.S. Geological Survey Earth Surface Dynamics Program, the U.S. Geological Survey National Cooperative Geologic Mapping Program, and the Smithsonian Institution. Papers are divided into two broad topics: the configuration, areal extent, and temporal development of the chain of interconnected lakes that emptied into Death Valley during periods of the Pleistocene and the late Cenozoic history of drainage integration in the lower Colorado River region. Papers are occasionally illustrated in both color and black and white. The publication contains no index.
