Microcirculation - Updates in the Next Frontier of Vascular Disease Michael S. Firstenberg, Aleksandar Kibel, 2024-01-17 Microcirculation reflects the vascular bridge which is the conduit of blood flow between the arteries and veins in the body It plays a critical role in the delivery of oxygen and nutrients to the cells of the body while also serving to wash away and eliminate biological waste products of metabolism A complex interplay exists between the normal structure and function of the larger vessels of the body and the blood coursing through This book discusses the evolving science in understanding the role of microcirculation in some of the most common and devastating diseases that plague humanity By understanding the

role of microcirculation in the normal feedback mechanisms that balance bleeding and clotting with the opportunities to manipulate this balance to treat disease the impact on the individual and social burden of arterial and venous occlusive and thromboembolic disease can be substantial Understanding disease mechanisms and enhancing our collective tools for diagnosis and treatment are some of the greatest challenges facing our global healthcare systems The chapters in this book serve as a foundation for further research into the quest to reduce if not eliminate one of the most significant causes of major morbidity mortality and overall loss of quality of life worldwide Without a doubt the impact of the body's microcirculation as our understanding continues to evolve and as emphasized in this text cannot and should not be underappreciated

Proceedings of the 3rd International Conference on Cardiovascular Diseases (ICCvD 2021) Heri Nurdianto, Isnatin Miladiyah, Nur Aisyah Jamil, 2023-02-10 This is an open access book The objectives of the conference are as follows to update knowledge about the relevant program priorities for addressing CVD burden in developing countries to explore options for the comprehensive management of primary cardiovascular risk factors such as high blood pressure high blood glucose level smoking and sedentary lifestyle to discuss the latest guidance and evidence on the early detection and management of CVD and its implementation in the context of developing countries including the impact of the COVID 19 pandemic on the management of CVD to strengthen interprofessional collaboration in addressing challenges using multidisciplinary approaches for the prevention treatment and rehabilitation of patients with CVD to update knowledge about health technology science and innovation related to the management and rehabilitation of patients with CVD *Vascular Disease, An Issue of Cardiology Clinics* Leonardo C.
