Beat Depression to Stay Healthier and Live Longer Gary S. Moak, 2016-02-04 Clinical depression is a serious medical illness that not only can turn a happy retirement into a time of misery but also leads to a wide range of health problems Depression increases the rate of disease such as stroke heart disease and Alzheimer s disease and worsens the course of others such as diabetes chronic lung disease and cancer It also contributes to avoidable disability and premature death Beat Depression to Stay Healthier and Live Longer alerts readers to this untold story It challenges beliefs that depression is normal in old age because old age is depressing instead helping readers see that depression is a serious brain disease often related to changes in the brain associated with the aging process Gary S Moak clearly and compassionately explains depression as a physically destructive state in which a brain on overdrive

runs the body ragged accelerating age related wear and tear Depression is not a harmless condition older adults can live with and Dr Moak addresses the impact of depression on specific geriatric health problems Case stories taken from the author s experience practicing geriatric psychiatry for thirty years are used to illustrate the physically and mentally harmful effects of depression and the road to recovering well The book is a call to action It encourages readers to seek treatment for depression offering hope that older adults can get their lives back before it is too late It provides practical guidance and advice for patients and family members about working with healthcare professionals to ensure that sufferers receive effective treatment for their depression and appropriate medical care for their physical needs By shedding light on the impact of depression on physical health Dr Moak spotlights the importance of recognizing the signs and symptoms of depression and brings much needed attention to a subject that is so often overlooked

Live Long, Die Short Roger Landry,2014-01-14 Over a decade ago a landmark ten year study by the MacArthur Foundation shattered the stereotypes of aging as a process of slow genetically determined decline Researchers found that that 70 percent of physical aging and about 50 percent of mental aging is determined by lifestyle the choices we make every day That means that if we optimize our lifestyles we can live longer and die shorter compress the decline period into the very end of a fulfilling active old age Dr Roger Landry and his colleagues have spent years bringing the MacArthur Study's findings to life with a program called Masterpiece Living In *Live Long Die Short* Landry shares the incredible story of that program and lays out a path for anyone at any point in life who wants to achieve authentic health and empower themselves to age in a better way Writing in a friendly conversational tone Dr Landry encourages you to take a Lifestyle Inventory to assess where your health stands now and then leads you through his Ten Tips for successful aging each of which is backed by the latest research real life stories and the insights Landry a former Air Force surgeon and current preventive medicine physician has gained in his years of experience The result is a guide that will reshape your conception of what it means to grow old and equip you with the tools you need to lead a long healthy happy life
