forestry on Scotland's landscapes is seen as increasingly important and new access rights have been put in place by the Land Reform Scotland Act 2003. Although these changes bring uncertainty and challenges they also bring a major opportunity to move decisively towards integrating landscape biodiversity and recreational objectives in land management. This book takes stock of the changes taking place and considers a number of case studies which together suggest that progress is being made. It looks ahead at future research and advisory needs and highlights some key challenges to achieving better integration in the future.

**Green Infrastructure** Benedetta Giudice, Gilles Novarina, Angioletta Voghera, 2023-05-23. This book analyses international Green Infrastructure (GI) planning and design strategies. The GI strategy is widely recognized for its multifunctionality as a tool for ecological, economic and social enhancement and multiscale planning. Starting from this assumption, the book intends to implement the concept of GI and blue networks in planning strategies and their linked urban projects. New urban and regional paradigms of the latest years such as urban sprawl, ecosystem services, biodiversity, urban resilience, climate change and health emergencies have made it necessary to rethink cities and territories and their related plans and projects. To satisfy these paradigms, worldwide plans and projects have started to focus both on short-term and long-term processes and strategies which integrate environmental, landscape and ecological elements.
