**Air Power And Maneuver Warfare** Professor Martin Van Crefeld,2015-11-06 An essential part of the Air War College Maxwell Air Force Base AFB Alabama curriculum consists of the study of military history and specific campaigns Distinguished military scholars often visit the college to discuss and explore issues with the faculty Martin van Creveld was one of those distinguished scholars He had previously been commissioned by the Air Staff to investigate the effects of the US Army s move toward a more maneuver oriented kind of warfare and the effect that move will have on the US Air Force role on the battlefield The Air Staff was concerned about a host of issues logistic support for a highly mobile force friendly force confusion on huge rapidly changing battlefields close air support with or without air base support and a host of other issues The bottom line for the Air Force concerned several issues of great impact First Must air combat change because land combat is changing and Is the decisiveness of air power increasing geometrically to the point where the twenty first century will find it is as decisive as ground power was in the twentieth century Our guest historian agrees that sophisticated highly technical air and space developments may have made air power dominant on the conventional battlefield The great exception however lies in the trend away from conventional to unconventional conflict To Professor van Creveld nation states have lost the monopoly on the legitimate use of violence To prepare for a conventional scenario is to prepare for the last war not the next one The possibility of more Lebanons is much higher than the likelihood of future Iraqs
