Harding, 2014-08-15. This is a historical narrative of the Third Infantry Division's experiences at the Anzio Nettuno beachhead from 22 January to 2 June 1944. It identifies major contributing factors to the Third Infantry Division's battlefield success at the battle of Anzio Nettuno. The battle is broken down into five distinct stages and investigated in a chronological manner. Potentially significant factors are evaluated in each stage of the battle and include terrain weather Allied air superiority and the quality of military intelligence available to the Third Infantry Division's commander. Also compared for each side are the quality of senior leadership previous combat experience the quality and quantity of manpower replacements and available artillery resources. This thesis concludes that the Third Infantry Division's battlefield success at Anzio Nettuno appears to have been to a large extent a result of the quality and stability of the division's senior leadership failures and missteps on the part of the higher German command echelons the division's masterful employment of field artillery and a highly effective training program      *Infantry* , 1973      **World War II: the Encyclopedia of the War Years, 1941-1945** Norman Polmar, Thomas B. General James Doolittle      *500 Days* Sean M. McAteer, 2009      **Norway 1940** James S. Corum, 2021-07-22. A history of the innovative German air campaign that ensured victory in the rapid conquest of Norway and an analysis of its importance to World War II and the development of air power. The German invasion of Norway was a pivotal moment in modern warfare the first joint campaign that featured air power as an equal element of all operations. It was in fact the superior use of their air force that gave the Germans the decisive margin of victory and ensured the failure of the Allied counter offensive in central Norway in April and May 1940. All aspects of air power were employed in Norway from long range bombing and reconnaissance to air transport with the Luftwaffe's ability to transport large numbers of troops and supply ground forces over great distances being particularly important. Norway was the first campaign in history in which key targets were seized

by airborne forces and the first in which air superiority was able to overcome the overwhelming naval superiority of an enemy. Researched from primary sources, this engaging history by air power expert Dr James Corum skilfully draws out where and why air power made the difference in Norway and analyses the campaign's influence on the coming months and years of World War II. The Luftwaffe James S. Corum, 1997. This study provides an appraisal of Germany's air forces from the post World War I era through the early stages of World War II. The author demolishes several myths surrounding the Luftwaffe, including the belief that they had no ideas beyond the support of ground forces. **Scenario Designer's Handbook (2nd Ed.)** Michael Dorosh, 2015. Department of Bibliography, 1978. **Meat Grinder** Prit Buttar, 2022-10-13. An engrossing history of the desperate battles for the Rzhev Salient, a forgotten story brought to life by the harrowing memoirs of German and Russian soldiers. The fighting between the German and Russian armies in the Rzhev Salient during World War II was so grisly, so murderous and saw such vast losses that the troops called the campaign 'The Meat Grinder'. Though millions of men would fight and die there, the Rzhev Salient does not have the name recognition of Leningrad or Moscow. It has been largely ignored by Western historians until now. In this book, Prit Buttar, a leading expert on the Eastern Front, reveals the depth and depravity of the bitter fighting. He details how the region held the promise of a renewed drive on Moscow for the German Army, a chance to turn the tide of war. Using German and Russian first-hand accounts, Buttar examines the major offensives launched by the Red Army against the salient, all of which were defeated with losses exceeding two million killed, wounded or missing, until eventually the Germans were forced to evacuate the salient in March 1943. Drawing on the latest research, 'Meat Grinder' provides a study of these horrific battles but also examines how the Red Army did learn from its colossal failures and how its timely analysis of these failures helped pave the way for the eventual Soviet victory against Army Group Centre in the summer of 1944, leaving the road to Berlin clear.
