Architecture and film have many things in common. Film narratives are embedded in scenes that visually support the story. Sometimes architecture even performs the role of an actor. Conversely, film with its multifaceted changing atmospheres reveals new layers of architecture which outside the cinema would remain concealed. In conclusion, film as a mass medium influences the way architecture is perceived and its image in society. Since the beginning of cinema, architecture has formed a symbiosis with film. With its systematic analysis, this book offers a scientifically researched history of mutual influence starting with filmography as a typology of well-known film sets through to the description of the chameleon effect between

**Modernity and the Architecture of Mexico** Edward R. Burian,2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obreg n Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus Modernity and the Architecture of Mexico will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect s agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

**Utopias and Architecture** Nathaniel Coleman, 2007-05-07

Utopian thought, though commonly characterized as projecting a future without a past, depends on golden models for the reinvention of what is. Through a detailed and innovative reassessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers, Coleman offers the reader a unique perspective of idealism in architectural design. With unparalleled depth and focus of vision on the work of Le Corbusier, Louis I. Kahn, and Aldo van Eyck, this book persuasively challenges predominant assumptions in current architectural discourse, forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hypermodern stance and orthodox modernist architecture.

Dwell, 2009-05

At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

**Modern Architecture in Mexico City** Kathryn E. O'Rourke, 2017-02-10

Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century. Invigorated by insights drawn from the first published histories of Mexican colonial architecture, which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s, a new generation of architects created profoundly visual modern buildings intended to convey Mexico's unique cultural character. By midcentury, these architects and their students had rewritten the country's architectural history and transformed the capital into a metropolis where new buildings that evoked pre-conquest colonial and International Style architecture coexisted. Through an exploration of schools, a university campus, a government ministry, a workers' park, and houses for Diego Rivera and Luis Barragán, Kathryn O'Rourke offers a new interpretation of modern architecture in the Mexican capital, showing close links between design, evolving understandings of national architectural history, folk art, and social reform. This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession.
