Lunar myth and worship through the ages Helena Petrovna Blavatsky, 2017-08-16 The Sun is the giver of life to the whole planetary system The Moon is the giver of life to our globe The Hindus proudly call themselves descendants of Solar and Lunar dynasties The Christians pretend to regard such beliefs as idolatry yet they adhere to a religion entirely based upon solar and lunar worship

Mystery 1 The lowest key to the androgynous Moon is anthropomorphic and phallic The highest key is purely theogonic and divine The Jewish god with which the Christians have burdened themselves is no higher than the lunar symbol of Nature's reproductive or generative faculty The entire Pantheon of lunar gods and goddesses consists of sons and husbands of their mothers and is identical with the Christian Trinity

Mystery 2 The riddle of the Two Ones unriddled The One Divine Essence ever unmanifested perpetually begets a second One manifested and androgynous in its nature The latter brings forth immaculately everything macro and micro cosmical in the universe But human procreation in the infernal regions of matter is far from divine it is a deadly sin Deus Lunus a male lunar deity became overtly androgyne in the Lemurian Race of our Round when sexes separated Later on its dual hermaphrodite power was exploited by Atlantean sorcerers Still in the present Aryan Race the same lunar solar worship continues dividing nations into two distinct and essentially antagonistic factions and cults Pagan and Papal cosmogonies are diametrically opposed The one is an ever youthful Mother Nature antitype of Sun and Moon creating immaculately the ideal universe the other by concocting an infernal Virgin Mary who brings forth a son of the earth earthy degrades everything divine and sacred to the lowest anthropomorphic goddess of the rabble The virgin goddess of the Latin Church is a faithful copy of the old pagan goddesses albeit counterfeit the twelve apostles stand for the twelve tribes the latter being personifications of the twelve great gods and the twelve signs of the Zodiac The liberal adoption by the Latin Church of such symbols as water fire sun moon and stars and a good many other things is a continuation of the old worship of Pagan nations under different names The belief that Fire finds refuge in Water was not limited to the old Scandinavians It was shared by all nations before taken up by the early Christians who symbolized the Holy Ghost under the shape of Fire the breath of the Father Sun descending into the Water or Sea Mother Mare Mary etc

offers a bold new mission for the U S space program to protect the Earth from the ever growing number of perils that threaten our way of life and even our very survival We are living through one of the most dangerous times in human history Nuclear chemical and biological weapons technology are proliferating and missile technology is falling into more and more hands Extreme natural disasters like hurricanes floods fires and earthquakes are becoming increasingly costly not only in dollars but in lives as population expands Environmental crises threaten to provoke massive famines and widespread social collapse Asteroids the size of battleships streak within striking distance of the earth every year One strategy offers the best hope of protecting us from all of these dangers a revitalized national space program that coordinates efforts in global defense in environmental protection in communications and in military security The Survival Imperative offers an impassioned argument for this bold initiative To demonstrate the urgency of his cause Burrows presents a vivid scenario an impact by a moderately large asteroid that triggers a series of nuclear exchanges environmental devastation and the slow disintegration of civilization And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon Most of all Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific but social an unwillingness to acknowledge the urgency of the crisis and to take the political risks needed to address it The question says Burrows is not whether we can do it but whether we will act before it s too late At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
