Lunatic Lovers Of Language:

Lunatic Lovers of Language Marina Yaguello,1991 Examines the creation of imaginary languages in history and fiction as an expression of the search for an original and primitive or universal language The author s other works include Les Mots et les Femmes 1978 and Alice au pays du Language 1981 *Imaginary Languages* Marina Yaguello,2022-04-19 An exploration of the practice of inventing languages from speaking in tongues to utopian schemes of universality to the discoveries of modern linguistics In Imaginary Languages Marina Yaguello explores the history and practice of inventing languages from religious speaking in tongues to politically utopian schemes of universality to the discoveries of modern linguistics She looks for imagined languages that are autonomous systems complete unto themselves and meant for communal use imaginary and therefore unlike both natural languages and historically attested languages and products of an individual effort to lay hold of language Inventors of languages Yaguello writes are madly in love they love an object that belongs to them only to the extent that they also share it with a community Yaguello investigates the sources of imaginary languages in myths dreams and utopias She takes readers on a tour of languages invented in literature from the sixteenth to the twentieth century including that in More s Utopia Leibniz s algebra of thought and Bulwer Lytton s linguistic fiction She examines the linguistic fantasies or madness of Georgian linguist Nikolai Marr and Swiss medium H l ne Smith and considers the quest for the true philosophical language Yaguello finds two abiding and somewhat contradictory forces the diversity of linguistic experience which stands opposed to unifying endeavors and on the other hand features shared by all languages natural or not and their users which justifies the universalist hypothesis Recent years have seen something of a boom in invented languages whether artificial languages meant to facilitate international communication or imagined languages constructed as part of science fiction worlds In Imaginary Languages an updated and expanded version of the earlier Les Fous du langage published in English as Lunatic Lovers of Language Yaguello shows that the invention of language is above all a passionate dizzying labor of love **Verbal Hygiene** Deborah Cameron,2012-03-15 In Verbal Hygiene Deborah Cameron takes a serious look at popular attitudes towards language and examines the practices by which people attempt to regulate its use Instead of dismissing the practice of verbal hygiene as a misguided and pernicious exercise she argues that popular discourse about language values good and bad right and wrong serves an important function for those engaged in it A series of case studies deal with specific examples of verbal hygiene the regulation of style by editors the teaching of English grammar in schools the movements for and against so called politically correct language and the advice given to women on how they can speak more effectively This Routledge Linguistics Classic includes a new foreword which looks at how the issues covered in the case studies have developed over time and a new afterword which discusses new concerns which have emerged in the last 15 years from the regimentation of language in the workplace to panics about immigration and terrorism which are expressed in linguistic terms Addressed to linguists to professional language users of all kinds and to anyone interested in language and

culture Verbal Hygiene calls for legitimate concerns about language and value to be discussed by experts and lay speakers alike in a rational and critical spirit   **Communicating Gender** Suzanne Romaine,1998-10-01 Taking a cross disciplinary approach Suzanne Romaine s main concern is to show how language and discourse play key roles in understanding and communicating gender and culture In addition to linguistics which provides the starting point and central focus of the book she draws on the fields of anthropology biology communication education economics history literary criticism philosophy psychology and sociology The text covers the core areas in the study of language and gender including how and where gender is indexed in language how men and women speak how children acquire gender differentiated language and sexism in language and language reform Although most of the examples are drawn primarily from English other European languages and non European languages such as Japanese are considered The text is written in an accessible way so that no prior knowledge of linguistics is necessary to understand the chapters containing linguistic analysis Each chapter is followed by exercises and discussion questions to facilitate the book s use as a classroom text The author reviews scholarly treatments of gender and then uses her own data material from the corpora of spoken and written English usage Special features include an examination of contemporary media sources such as newspapers advertising and television a discussion of women s speculative fiction a study of gender and advertising with special attention paid to the role played by language in these domains and a review of French feminist thought particularly as it relates to the issue of language reform   *Linguistic Turns, 1890-1950* Ken Hirschkop,2019-04-04 Linguistic Turns rewrites the intellectual and cultural history of early twentieth century Europe In chapters that study the work of Saussure Russell Wittgenstein Bakhtin Benjamin Cassirer Shklovskii the Russian Futurists Ogden and Richards Sorel Gramsci and others it shows how European intellectuals came to invest language with extraordinary force at a time when the social and political order of the continent was itself in question By examining linguistic turns in concert rather than in isolation the volume changes the way we see them no longer simply as moves in individual disciplines but as elements of a larger constellation held together by common concerns and anxieties In a series of detailed readings the volume reveals how each linguistic turn invested language as such with powers that could redeem not just individual disciplines but Europe itself It shows how in the hands of different writers language becomes a model of social and political order a tool guaranteeing analytical precision a vehicle of dynamic change a storehouse of mythical collective energy a template for civil society and an image of justice itself By detailing the force linguistic turns attribute to language and the way in which they contrast language as such with actual language the volume dissects the investments made in words and sentences and the visions behind them The constellation of linguistic turns is explored as an intellectual event in its own right and as the pursuit of social theory by other means   **Imagining Language** Jed Rasula,Steve McCaffery,2001 When works such as Joyce s Finnegans Wake and Stein s Tender Buttons were first introduced they went so far beyond prevailing linguistic standards that they were widely considered unreadable if not scandalous Jed

Rasula and Steve McCaffery take these and other examples of twentieth century avant garde writing as the starting point for a collection of writings that demonstrates a continuum of creative conjecture on language from antiquity to the present The anthology which spans three millennia generally bypasses chronology in order to illuminate unexpected congruities between seemingly discordant materials Together the writings celebrate the scope and prodigality of linguistic speculation in the West going back to the pre Socratics *Bending the Rules in the Quest for an Authentic Female Identity* Cristina Santos,2004 The narrative style of both Clarice Lispector and Carmen Boullosa is characterized by a postmodern tendency toward an increased reader participation This is accomplished by a process of liberalizing a pre established socio cultural repertoire with respect to female identity The female protagonists created by Lispector and Boullosa and examined in this book struggle to find their true voices and their real life experiences The resulting literary style of both these authors parallels this struggle subverting traditional narrative structure and utilizing a dialogue that is particularly suited to describe this feminine process of conscientization *Hidden Codes & Grand Designs* Pierre Berloquin,2010-11-09 Did the Masons encode messages in walls and even in the street plan of Washington D C Does the Hebrew Bible conceal hidden mysteries Ingenious methods for encoding secrets have taken many amazing turns through the ages from the military signals the Romans flashed from hilltop to hilltop to the computer codes that guard your cash at the ATM Pierre Berloquin one of France s leading puzzle book authors takes you on a tour of them all in a book full of astonishing historical insights With more than 150 brain teasing problems for readers to solve for themselves this is a journey beyond the gee whiz and deep into the how to of codes ciphers and other secret communication systems <u>Prior to Meaning</u> Steve McCaffery,2001 Prior to Meaning collects a decade of writing on poetry language and the theory of writing by one of the most innovative and conceptually challenging poets of the last twenty five years In essays that are wide ranging richly detailed and novel in their surprising juxtapositions of disparate material Steve McCaffery works to undo the current bifurcation between theory and practice to show how a poetic text might be the source rather than the product of the theoretical against which it must be read **To See Paris and Die** Eleonory Gilburd,2018-12-28 After Stalin died a torrent of Western novels films and paintings invaded Soviet streets and homes Soviet citizens invested these imports with political and personal significance transforming them into intimate possessions Eleonory Gilburd reveals how Western culture defined the last three decades of the Soviet Union its death and afterlife <u>From India to the Planet Mars</u> Theodore Flournoy,2015-03-08 A classic in the field of psychology From India to Planet Mars 1900 depicts the remarkable multiple existence of the medium H l ne Smith who claimed to be the reincarnation of Marie Antoinette of a Hindu princess from fifteenth century India and of a regular visitor to Mars whose landscapes she painted and whose language she appeared to speak fluently Through a psychological interpretation of these fantasies which consisted in the subliminal elaboration of forgotten memories Th odore Flournoy vastly extended the scope and understanding of the unconscious and in particular of its creative and mythopoetic capacities In the introduction to this work Soriu Shamdasani

evokes the rich cultural and intellectual setting which Flournoy published his findings and discusses their impact on Freud Jung and other pioneers psychology Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Multilingualism and Applied Comparative Linguistics (Volume II) Frank Boers,Jeroen Darquennes,Koen Kerremans,2009-10-02 In February 2006 the first international conference on Multilingualism and Applied Comparative Linguistics MACL was held in Brussels Belgium The aim of the MACL conference was to bring together scholars from various branches of applied linguistics with a shared interest in cross linguistic and cross cultural communication The conference thus fostered an exchange of knowledge and expertise among researchers from various disciplines including educational linguistics cultural linguistics terminography translation studies and studies of specialised languages The present book is the second of two volumes containing a selection from the approximately 120 papers that were presented at that three day event The book comprises five chapters reflecting different research perspectives on cross linguistic and cross cultural communication The first chapter covers research articles on metaphors and planned languages The second chapter comprises articles dealing with language attitudes language proficiency and language practices in cross linguistic and cross cultural communicative contexts Chapter three features articles in the field of discourse analysis research In the fourth chapter research is presented that pertains to terminology and specialised languages Finally chapter five deals with translation studies **Translating the Perception of Text** Clive Scott,2017-07-05 Translation often proceeds as if languages already existed as if the task of the translator were to make an appropriate selection from available resources Clive Scott challenges this tacit assumption If the translator is to do justice to himself herself as a reader if the translator is to become the creative writer of his her reading then the language of translation must be equal to the translators perceptual experience of and bodily responses to source texts Each renewal of perceptual and physiological contact with a text involves a renewal of the ways we think language and use our expressive faculties listening speaking writing Phenomenology and particularly the phenomenology of Merleau Ponty underpins this new approach to translation The task of the translator is tirelessly to develop new translational languages ever to move beyond the bilingual into the multilingual and always to remember that language is as much an active instrument of perception as an object of perception Clive Scott is Professor Emeritus of European Literature at the University of East Anglia and a Fellow of the British Academy The Korean Alphabet Young-Key Kim-Renaud,2021-05-25 The Korean alphabet commonly known as han gul has been called one of the greatest intellectual achievements of humankind Experts agree that few writing systems can match its simplicity and

efficiency its elegance and intelligence The only alphabet completely native to East Asia han gul distinguishes itself among writing systems of the world with its scientific qualities and unusual linguistic fit to the Korean language Most strikingly the theoretical underpinnings of the language as well as the time and circumstances of its creation are clearly known and recorded Han gul was invented in 1443 and promulgated in 1446 by King Sejong 1418 1450 sage ruler of the Yi dynasty 1392 1910 This volume the first book length work on han gul in English by Korean language specialists is comprised of ten essays by the most active scholars of the Korean writing system An instructive commentary by eminent linguist Samuel Martin follows offering perceptive comments on the essays as well as a discussion on Martin s own research findings on the script

The Making of the Modern Canon Jan Gorak,1991-01-01 This important contribution to the canon debate is remarkable in examining the actual process of canon formation from threee unusual and complementary angles The first two chapters discuss historical attitudes to canons from antiquity onwards showing the religious aesthetic cultural and political interests which have shaped our modern critical canons Each of the four succeeding chapters examines an exemplary defendant interpreter or critic of canons Ernst Gomrich Northrop Frye Frank Kermode and Edward Said A final chapter considers the origins and rationale of the contemporary debate emphasising the disciplinary and aesthetic problems we must confront if our cultural institutions are to meet the challenging needs of the next century Professor Gorak teaches at the University of Denver His publications include God the Artist 1987 Critic of Crisis 1987 and The Alien Mind of Raymond Williams 1988 *Stalin on Linguistics and Other Essays* P. Gray,2002-05-21 Piers Gray was one of the most brilliant literary writers of his generation These essays ranging from Oscar Wilde to Levin from Shakespeare to pulp fiction use the full resources of literary and linguistic analysis to produce a reading of European culture and society in the twentieth century In his final posthumous essay On Linearity Gray summons all his reading and knowledge to deliver his final judgement on life and death **Investigating the Supernatural** Sofie Lachapelle,2022-02-03 A convincing account of science s flirtation with the marginal and the marvelous from the author of Conjuring Science Journal of the History of the Behavioral Sciences S ances were wildly popular in France between 1850 and 1930 when members of the general public and scholars alike turned to the wondrous as a means of understanding and explaining the world Sofie Lachapelle explores how five distinct groups attempted to use and legitimize s ances spiritists who tried to create a new science concerned with the spiritual realm and the afterlife occultists who hoped to connect ancient revelations with contemporary science physicians psychiatrists and psychologists who developed a pathology of supernatural experiences psychical researchers who drew on the unexplained experiences of the public to create a new field of research and metapsychists who attempted to develop a new science of yet to be understood natural forces An enlightening and entertaining narrative that includes colorful people like Allan Kardec a pseudonymous former mathematics teacher from Lyon who wrote successful works on the science of the s ance and what happened after death Investigating the Supernatural reveals the rich and vibrant diversity of unorthodox beliefs and

practices that existed at the borders of the French scientific culture in the late nineteenth and early twentieth centuries What is science In her engaging book Sophie Lachapelle probes for an answer by looking at the liminal realm between science and superstition and the attempt to render the supernatural explicable in naturalistic terms Isis A welcome addition to the growing literature on spiritism occultism and physical research in modern France French History **Hélène Smith** Claudie Massicotte,2023 In 1896 a young Genevan medium named H l ne Smith perceived in trance the following words from a Martian inhabitant michma michtmon mimini thouainenm mimatchineg Those attending her s ance dutifully transcribed these words and the event marked the beginning of a series of occult experiences that transported her to the red planet In her state of trance Smith came to produce foreign conversations a new alphabet and paintings of the Martian surroundings that captured the popular and scientific imagination of Geneva Alongside her Martian travels she also retrieved memories of her past lives as a fifteenth century Hindoo princess and as Queen Marie Antoinette Today Smith s s ances may appear to be nothing more than eccentric practices at the margins of modernity As author Claudie Massicotte argues however the medium came to embody the extreme possibilities of a new form of subjectivity with her s ances becoming important loci for pioneering authors discoveries in psychology linguistics and the arts Through analyses of archival documents correspondences and publications on the medium Massicotte sheds light on the role of women in the construction of turn of the century psychological discourses showing how Smith challenged traditional representations of female patients as powerless victims and passive objects of powerful doctors She shows how the medium became the site of conflicting theories about subjectivity specifically one s relationship to embodiment desire language art and madness while unleashing a radical form of creativity that troubled existing paradigms of modern sciences Massicotte skillfully retraces the story of this prolific figure and the authors scientists and artists she inspired in order to bring to light a forgotten chapter in modern intellectual history **E.T. Culture** Debbora Battaglia,2006-01-30 Cultural readings of alien encounters **Trance Speakers** Claudie Massicotte,2017-05-17 Few people know that Susanna Moodie participated in spiritual s ances with her husband Dunbar and her sister Catharine Parr Traill Moodie like many other women found in her communications with the departed an important space to question her commitment to authorship and her understanding of femininity Retracing the history of possession and mediumship among women following the emergence of spiritualism in mid nineteenth century Canada and unearthing a vast collection of archival documents and photographs from s ances Claudie Massicotte pinpoints spiritualism as a site of conflict and gender struggle and redefines modern understandings of female agency Trance Speakers offers a new feminist and psychoanalytical approach to the religious and creative practice of trance arguing that by providing women with a voice for their conscious and unconscious desires this phenomenon helped them resolve their inner struggles in a society that sought to confine their lives Drawing attention to the fascinating history of spiritualism and its persistent appeal to women Massicotte makes a strong case for moving this practice out of the margins of the past A compelling new reading of spiritual

possession as a response to conflicting interpretations of authorship agency and gender Trance Speakers shines a much needed light on women s religious practices and on the history of spiritualist traditions and travels across North America and Europe
