Emerging Respiratory Infections in the 21st Century, An Issue of Infectious Disease Clinics Alimuddin

Zumla, Wing-Wai Yew, David S.C. Hui, 2010-09-28 Respiratory infections are among the most common causes of morbidity and mortality worldwide. These infections present a special challenge to physicians for several reasons including the recent disasters caused by severe acute respiratory syndrome (SARS) and bird and swine influenza, the increase in viral and bacterial resistance to currently available anti-microbial drugs, the increased frequency of new viral lung infections in clinical practice, and the worldwide emergence of deadly drug-resistant forms of TB. For these reasons, it is important for infectious disease specialists to have an overview of emerging respiratory infections.

Tropical Lung Disease, Second Edition Om Sharma, 2005-11-01 This authoritative guide provides state-of-the-art reviews of the most commonly encountered infectious and noninfectious tropical pulmonary diseases and emphasizes current approaches to the identification, diagnosis, and treatment of tropical lung disorders, offering a concise overview of imaging services in the tropics as well as authoritative coverage of specific diseases such as tuberculosis, tropical pulmonary eosinophilia, schistosomiasis, malaria, amebiasis, Behçet's disease, and Familial Mediterranean Fever (FMF).

Respiratory Infections Lionel Mandell, Mark Woodhead, Santiago Ewig, Antoni Torres, 2006-10-27 The aim of the volume is to provide an authoritative and international treatise bringing together current knowledge in the field of respiratory infection. The book will be organized by presentation rather than causative organism, a differentiating feature from the existing competition, and will be divided into four parts: General Issues, Community.
