Fascial Dysfunction Leon Chaitow, 2018-11-01 Fascial dysfunction is now recognised as one of the main underlying causes of musculoskeletal pain leading to impaired and reduced mobility. These are the symptoms which confront all practitioners of manual therapy in their everyday practice. In this second edition of his very successful book, Leon Chaitow brings together contributions from 20 leading practitioners and researchers from many different fields of manual therapy. *Fascial Dysfunction: Manual Therapy Approaches*, Second Edition, aims to help those practitioners to assess more precisely the dysfunction of their clients and its cause and to increase practitioner awareness of the various techniques which may help them in their attempts to alleviate their clients' problems. New features of the Second edition include: Descriptions of new research evidence and its implications for practice; The dependence of collagen health on a mixture of balanced internal and external tension; The importance of adequate hydration; The possible role of the telocyte; The importance of dosage of therapies in management of fascial dysfunction; New chapters on Gua Sha and cupping; Global postural re-education; Scar remodelling. The book is in two sections. Section I, written by Chaitow with a contribution by Tom Myers, presents a review of the current understanding of the function of fascia in the human body and describes what can go wrong, the causes and effects of fascial dysfunction and disease and how to assess the problem and remove obstacles to the success of treatment. Section II contains chapters by experts in different types of manual therapy, including three by Chaitow. Each practitioner describes their own approach to the problem of assessing and treating fascial dysfunction and explains their specialist therapeutic approach. These approaches include Bowen Therapy, Connective Tissue Manipulation and Skin Rolling, Fascia-oriented training applications in sports and movement therapy, The Fascial Manipulation method applied to low back pain, Fascial Unwinding, Balanced Ligamentous Tension Technique, Gua sha press stroking and Ba guan cupping, traditional East Asian instrument-assisted manual therapies, Muscle Energy Techniques (MET), Myofascial Induction Therapy (MIT), Neuromuscular Technique and associated Soft Tissue Manipulation Modalities, Positional Release Techniques including counterstrain, Global Postural Re-education, Souchard Method, Rolfing, Structural Integration, Management of Scars and Adhesions, Manual Matrix Remodeling in myofascial injuries, scar modeling technique, Massage Therapy and Fascia Trigger Point release methods including dry needling. **Cumulated Index Medicus**, 1965 *Positive or Negative? The Effect of Emerging Technologies and Products on Mental Health* Chao Guo, Stuart Gilmour, Peige Song, Aiping Fang, 2023-11-02 Emerging technologies and products such as digital health technology, computing platforms, wearable devices, smartphone sensors and electronic gadgets have the potential to transform and empower society while simultaneously presenting unprecedented challenges in our life. Some like electronic cigarettes and e-cigarettes are for entertainment, some like online conference platforms are for convenience and some like social media have become a life necessity. However, there is an ongoing debate about whether the use of physical and virtual digital technology products can do harm to mental health. Some

evidence based research shows that frequent use of social media may cause depression and anxiety and derived behavioral phenomena like cyberbullying and game addiction which negatively affect people's lives Other scholars think digital technology products could provide insights into timely personalized engaging and accessible intervention promotion and improvement of mental health Given the ubiquity of digital devices and their complex and subtle associations with mental health more research is needed to bring benefits to both research and daily life practices
