Management of Medical Technology Eliezer Geisler, Ori Heller, 2012-12-06 This is the second book in the series of books that we edit on the Management of Medical Technology MMT published by Kluwer Academic Publishers The first book *Managing Technology in Health Care* offered a broad brushed view of the topics involved in the new and exciting area of MMT that we have launched A group of distinguished scholars contributed to the first book While working on the first book in the series and on a variety of articles in MMT we began to realize that there is an urgent need for a comprehensive and highly focused book which will introduce and define the area of MMT In addition we had just completed the two studies of MMT in American hospitals and had a magnificent database fully analyzed With three months left in the first author's sabbatical and thanks to the encouragement from our editor at Kluwer Gary Folven we took to the task of writing this book The merging in this book of the description of a new intellectual space and the write up of the results from our MMT studies have created a unique blend of very attractive reading material The reader will find this book to be a fascinating adventure into a newly created area of intellectual endeavor coupled with findings about how the health care delivery system manages technology Regardless of the reader's background this book will certainly be of interest as it links the medical and business frameworks

Catch-Up and Competitiveness in China Jin Zhang, 2004-07-31 This book examines the role of corporate structure including the role of corporate headquarters in the success of large firms It considers these issues in relation to large global corporations thereby providing a benchmark which is then used as a contrast in a discussion of corporate structure and the role of corporate headquarters within large Chinese firms many of which have evolved from former government ministries It includes a detailed case study of firms in the crucially important oil and petro chemical sector Overall the book shows what a hugely competitive battle China's emerging national champions face with their global competitors and puts forward policy implications both for large Chinese firms and for the Chinese government concerning how business systems should be reformed further still in order to construct globally competitive large industrial corporations

Governing by Network Stephen Goldsmith, William D. Eggers, 2005-06-22 A fundamental but mostly hidden transformation is happening in the way public services are being delivered and in the way local and national governments fulfill their policy goals Government executives are redefining their core responsibilities away from managing workers and providing services directly to orchestrating networks of public private and nonprofit organizations to deliver the services that government once did itself Authors Stephen Goldsmith and William D Eggers call this new model governing by network and maintain that the new approach is a dramatically different type of endeavor that simply managing divisions of employees Like any changes of such magnitude it poses major challenges for those in charge Faced by a web of relationships
