The Divine Economy Paul Seabright, 2024-05-14 Longlisted for the Financial Times and Schroders Business Book of the Year Award A novel economic interpretation of how religions have become so powerful in the modern world Religion in the twenty first century is alive and well across the world despite its apparent decline in North America and parts of Europe Vigorous competition between and within religious movements has led to their accumulating great power and wealth Religions in many traditions have honed their competitive strategies over thousands of years Today they are big business like businesses they must recruit raise funds disburse budgets manage facilities organize transportation motivate employees and get their message out In The Divine Economy economist Paul Seabright argues that religious movements are a special kind of business they are platforms bringing together communities of members who seek many different things from one another spiritual fulfilment friendship and marriage networks even business opportunities Their function as platforms he contends is what has allowed religions to consolidate and wield power This power can be used for good especially when religious movements provide their members with insurance against the shocks of modern life and a sense of worth in their communities It can also be used for harm political leaders often instrumentalize religious movements for authoritarian ends and religious leaders can exploit the trust of members to inflict sexual emotional financial or physical abuse or to provoke violence against outsiders Writing in a nonpartisan spirit Seabright uses insights from economics to show how religion and secular society can work together in a world where some people feel no need for religion but many continue to respond with enthusiasm to its call
