Building and Using Comparable Corpora Serge Sharoff,Reinhard Rapp,Pierre Zweigenbaum,Pascale Fung,2013-12-13 The 1990s saw a paradigm change in the use of corpus driven methods in NLP In the field of multilingual NLP such as machine translation and terminology mining this implied the use of parallel corpora However parallel resources are relatively scarce many more texts are produced daily by native speakers of any given language than translated This situation resulted in a natural drive towards the use of comparable corpora i.e non parallel texts in the same domain or genre Nevertheless this research direction has not produced a single authoritative source suitable for researchers and students coming to the field

The proposed volume provides a reference source identifying the state of the art in the field as well as future trends The book is intended for specialists and students in natural language processing machine translation and computer assisted translation
