## **Machine Age Maya:**

**Machine Age Maya** Manning Nash, 1958 This is the story of the people of Cantel an Indian community in the western highlands of Guatemala It is the description and analysis of a people who have successfully moved from a simple farming technology not much removed from that of their pre Columbian ancestors to operating in the midst of Central America s largest textile mill The adaptation of this Indian community to factory work cash wages and the wider ties of the modern industrial world is a precipitate of history Chapter 1 page 1      Machine Age Maya ; the Industrialization of a Guatemala Community Manning Nash, 1958      *The Redivision of Labor* Laurel Bossen, 1984-01-01 How does economic development affect women in Latin America This work examines the different ways that economic and social relations between the sexes are redefined in Guatemala as capitalist expansion transforms the nation An unusual and rich combination of fieldwork in four communities supplemented by national level data shows there are major differences in the sexual division of labor in four major segments of Guatemalan society the Maya peasantry the plantations the urban poor and the middle class Without losing sight of the role of each community within the national economy local economic and social options are described to show how economic change alters women s status relative to men s The treatment of these differences goes beyond quantitative summaries to include life histories illustrating the complex choices women make and their adaptive strategies The importance of cultural class and regional differences are brought to bear on the interpretation of different patterns of male female relations while local community adaptations are set against the larger background of capitalist expansion in Latin America This book provides a unique contribution to the literature of Mesoamerican communities in that it redresses the imbalance in community level coverage of women s economic and social position within the Maya population and it provides data on several types of communities that have scarcely been covered by anthropologists working in Mesoamerica The comparative material on Maya and Ladino rural and urban and the poor and the elite is used to advance the theoretical understanding of the changing causes of women s subordination in the Third World Rejecting conventional explanations of machismo and traditional culture as cause of male dominance this work explores the multi faceted effects of the larger capitalist system on sexual stratification      **Fanning the Sacred Flame** Matthew A. in a particular society give rise to certain patterns in the personalities of its members What are the consequences Alex Inkeles surveys various definitions of national character tracing developments through the twentieth century His approach is to examine the regularity of specific personality patterns among individuals in a society He argues that modal personality may be extremely important in determining which new cultural elements are accepted and which institutional forms persist in a society Reviewing previous studies Inkeles canvasses the attitudes and psychological states of different nations in an effort to discover a set of values in the United States He concludes that despite recent advances in the field there is much to be done before we can have a clear picture of the degree of differentiation in the personality structure of modern nations Until now there were few formal definitions and discussions on national character and the limits of this field of study This book will be of great interest to psychologists sociologists philosophers and political theorists
