John Hinnells, 2004-05-24 A Handbook of Living Religions John R. Hinnells, 1984 From Primitive to Indigenous James L. Cox, 2016-04-22 The academic study of Indigenous Religions developed historically from missiological and anthropological sources but little analysis has been devoted to this classification within departments of religious studies Evaluating this assumption in the light of case studies drawn from Zimbabwe Alaska and shamanic traditions and in view of current debates over primitivism James Cox mounts a defence for the scholarly use of the category Indigenous Religions World Religions and Multiculturalism, 2010-10-05 This book is about new forms of religiosity and religious activity emerging in the context of their dialectic relations with contemporary multicultural realities World religions are effectively a major agent of the multiculturalization of contemporary societies However multiculturalism pushes them not only toward change and reforms but also toward new conflicts between and within them This process should remind us of the Jewish legend of the Golem an animated being created by man which finally challenges the latter's control over it a dialectic relation indeed World religions today greatly contribute to a world dis order that is multicultural both when viewed as a whole and from within most

societies that compose it It is a development that contrasts both with the assumption that globalization implies one way homogenization and convergence to Western modernity and the expectation that globalization would be bound to polarize homogeneous civilizations

Religion and Democracy Carsten Anckar, 2012-05-23 This important new study empirically assesses the relationship between religion and democracy looking at the global regional and individual country picture Using

a wide range of quantitative data Anckar tests the validity of Huntington's claim that democracy and religion are tightly connected and that western Christianity is the only religion capable of supporting democratic institutions Anckar evaluates both the broader assumptions that the introduction and the stability of a democratic form of government is dependent on the dominating religion in the country at the macro level and the suggestion that at the individual level religious adherence is related to pro democratic values The volume discusses how whilst at first sight Huntington's theory appears to receive widespread support on closer evaluation there data reveals anomalies that merit further discussion Whilst it appears that Christianity does seem to provide the most supportive environment democracy Buddhist countries appear to have results similar to those where Islam is the predominant religion The relationship between Islam and democracy is also subjected to an extensive discussion key findings such as the fact that democracy seems to have the greatest chances of success in Muslim countries situated far from Mecca and Medina are developed and examined with important new conclusions reached Examining religions including Christianity Islam Buddhism Hinduism Chinese folk religion Confucianism Taoism and Judaism Anckar seeks to demonstrate that the political context is more important than religious affiliation for explaining attitudes towards democracy Thus at least from the individual perspective religion is unimportant as an explanation for democratic values In contrast to Huntington's predictions the results of this study will show that the future of democracy does not look so gloomy after all
