The Limits Of Protectionism Michael Lusztig, 2010-06-15 Conventional wisdom holds that free trade is economically beneficial to nations But this does not prevent industries and interest groups from lobbying their governments for protection which creates a fear of electoral backlash among politicians hoping to promote free trade The Limits of Protectionism demonstrates how governments can attain those economic benefits while avoiding the political costs Michael Lusztig's theoretical model focuses on a process by which protectionists can be pushed to restructure and compete in a global economy In this process a small cutback in domestic protection leads to lost market shares at home producers must then turn to overseas exports and as the size of foreign profits grow former protectionists become active advocates for more and greater free trade opportunities In a wide ranging array of case studies from nineteenth century Britain to Depression era United States to contemporary New Zealand Australia Brazil Canada Chile and Mexico Lusztig reveals that if skillfully handled governments can eliminate the obstacles to free trade and enjoy continued economic growth without fear of protectionist groups seeking revenge at the ballot box
