Reclaiming America Nike Clean Air:

Reclaiming America Randy Shaw, 1999-06-07 Shaw provides the definitive account of the historic national campaign to reform Nike's labor practices. A must read for everyone seeking to achieve greater social and economic fairness in the 21st century. Medea Benjamin Co Director Global Exchange

Reclaiming America Randy Shaw, 2023-04-28 Have activists taken the bumper sticker adage Think Globally Act Locally too literally? Randy Shaw argues that they have with destructive consequences for America. Since the 1970s activist participation in national struggles has steadily given way to a nearly exclusive focus on local issues. America's political and corporate elite has succeeded in controlling the national agenda while their adversaries the citizen activists and organizations who spent decades building federal programs to reflect the country's progressive ideals increasingly bypass national fights. The result has been not only the dismantling of hard won federal programs but also the sabotaging of local agendas and community institutions by decisions made in the national arena. Shaw urges activists and their organizations to implement a new national activism by channeling energy from closely knit local groups into broader causes. Such activism enables locally oriented activists to shape America's future and work on national fights without traveling to Washington D C but instead working in their own backyards. Focusing on the David and Goliath struggle between Nike and grassroots activists critical of the company's overseas labor practices, Shaw shows how national activism can rewrite the supposedly ironclad rules of the global economy by ensuring fair wages and decent living standards for workers at home and abroad. Similarly the recent struggles for stronger clean air standards and new federal budget priorities demonstrate the potential grassroots national activism to overcome the corporate and moneyed interests that increasingly dictate America's future. Reclaiming America's final section describes how community based nonprofit organizations the media and the Internet are critical resources for building national activism. Shaw declares that community based groups can and must combine their service work with national grassroots advocacy. He also describes how activists can use public relations to win attention in today's sprawling media environment and he details the movement building potential of e mail. All these resources are essential for activists and their organizations to reclaim America's progressive ideals. Between Fear and Hope Andrew L. Barlow, 2003-08-01 Globalization is transforming societies everywhere in paradoxical and contradictory ways. This book examines globalization's impact on race in the United States since the mid 1970s. On one hand globalization is creating conditions that support intensified efforts to

claim white privileges But globalization also creates new possibilities for anti racist movements and thus the potential to undermine racial privileges Globalization is thus transforming the terrain of all racial projects in the United States This book is an original contribution to the study of race It provides a structural analysis of race and a methodology for connecting global to national and local racial processes Written in a lively and down to earth style this book is a call to action in a time of fear and hope

Political Consumerism Dietlind Stolle,Michele Micheletti,2013-08-26 Political Consumerism captures the creative ways in which consumers and citizens turn to the market as their arena for politics This book theorizes describes analyzes compares and evaluates how political consumers target corporations to solve globalized problems It demonstrates the reconfiguration of civic engagement political participation and citizenship Unlike other studies this book also evaluates if and how consumer actions are or can become effective mechanisms of global change

Cultural Studies and Anti-Consumerism Sam Binkley,Jo Littler,2014-02-25 Anti consumerism has become a conspicuous part of contemporary activism and popular culture from culture jams and actions against Esso and Starbucks through the downshifting and voluntary simplicity movements the rise of ethical consumption and organic and the high profile of films and books like Supersize Me and No Logo A rising awareness of labor conditions in overseas plants the environmental impact of intensified consumer lifestyles and the effects of neo liberal privatization have all stimulated such popular cultural opposition However the subject of anti consumerism has received relatively little theoretical attention particularly from cultural studies which is surprising given the discipline s historical investments in extending radical politics and exploring the complexities of consumer desire This book considers how the expanding resources of contemporary cultural theory might be drawn upon to understand anti consumerist identifications and practices how railing against the social and cultural effects of consumerism has a complex past as well as present and it pays attention to the interplays between the different movements of anti consumerism and the particular modes of consumer culture in which they exist In addition as well as using cultural studies to analyse anti consumerism it also asks how such anti consumerist practices and discourse challenges some of the presumptions and positions currently held in cultural studies This book was previously published as a special issue of Cultural Studies

The Leftmost City Richard Gendron,2018-04-17 Almost all US cities are controlled by real estate and development interests but Santa Cruz California is a deviant case An unusual coalition of socialist feminists environmentalists social welfare liberals and neighborhood activists has stopped every growth project proposed by landowners and developers since 1969 and controlled the city council since 1981 Even after a 1989 earthquake forced the city to rebuild its entire downtown the progressive elected officials prevailed over developers and landowners Drawing on

hundreds of primary documents as well as original previously unpublished interviews The Leftmost City utilizes an extended case study of Santa Cruz to critique three major theories of urban power Marxism public choice theory and regime theory Santa Cruz is presented within the context of other progressive attempts to shape city government and the authors findings support growth coalition theory which stresses the conflict between real estate interests and neighborhoods as the fundamental axis of urban politics The authors conclude their analysis by applying insights gleaned from Santa Cruz to progressive movements nationwide offering a template for progressive coalitions to effectively organize to achieve political power

They Say Cutback, We Say Fight Back! Ellen Reese, 2011-11-01 In 1996 President Bill Clinton hailed the end of welfare as we know it when he signed the Personal Responsibility and Work Opportunity Act The law effectively transformed the nation's welfare system from an entitlement to a work based one instituting new time limits on welfare payments and restrictions on public assistance for legal immigrants In *They Say Cutback We Say Fight Back* Ellen Reese offers a timely review of welfare reform and its controversial design now sorely tested in the aftermath of the Great Recession The book also chronicles the largely untold story of a new grassroots coalition

that opposed the law and continues to challenge and reshape its legacy While most accounts of welfare policy highlight themes of race class and gender They Say Cutback examines how welfare recipients and their allies contested welfare reform from the bottom up Using in depth case studies of campaigns in Wisconsin and California Reese argues that a crucial phase in policymaking unfolded after the bill s passage As counties and states set out to redesign their welfare programs activists scored significant victories by lobbying officials at different levels of American government through media outreach protests and organizing Such efforts tended to enjoy more success when based on broad coalitions that cut across race and class drawing together a shifting alliance of immigrants public sector unions feminists and the poor The book tracks the tensions and strategies of this unwieldy group brought together inadvertently by their opposition to four major aspects of welfare reform immigrants benefits welfare to work policies privatization of welfare agencies and child care services Success in scoring reversals was uneven and subject to local demographic political and institutional factors In California for example workfare policies created a large and concentrated pool of new workers that public sector unions could organize in campaigns to change policies In Wisconsin by contrast such workers were scattered and largely placed in private sector jobs leaving unions at a disadvantage Large Latino and Asian immigrant populations in California successfully lobbied to restore access to public assistance programs while mobilization in Wisconsin remained more limited On the other hand the unionization of child care providers succeeded in Wisconsin but failed in California because of contrasting gubernatorial politics With vivid descriptions of the new players and alliances in each of these campaigns Reese paints a nuanced and complex portrait of the modern American welfare state At a time when more than 40 million Americans live in poverty They Say Cutback offers a sobering assessment of the nation s safety net As policymakers confront budget deficits and a new era of austerity this book provides an authoritative guide for both scholars and activists looking for lessons to direct future efforts to change welfare policy A Volume in the American Sociological Association s Rose Series in Sociology [Growing in the Dark](#) Janine M.
